

Jersey PS - Summer Institute Electives

****Available to youth entering Grades 4-8 only.**

Artzcool

You don't have to be an artist to be cool! If you like using your creativity, this is the place for you! Painting, drawing, colouring, collage making, crafts, and so much more! The sky is the limit because we try it all!

Ball Sports

Looking for fast-paced excitement? Learn the fundamentals of a variety of ball sports like tennis, volleyball, hockey, football, soccer, and basketball and apply them to game situations.

Cycling

Interested in learning how to maintain a bike? Want to know the rules for the road? Then come biking with us through the community; we'll lead the way! This elective is not recommended for beginner bikers.

FIFA Soccer

World Cup Soccer is here! In this elective, participants will cheer and play for a nation while learning and practicing soccer techniques. Build unique skills and leadership through the excitement of scrimmages and real-game action.

Game On

In Game On, you will learn a new "high energy" game every day that you can play with your family and friends. Some of the games will range from "Capture the Flag", "Spud", "Frozen Critters" to various forms of dodgeball. Participants will also have an opportunity to create their own games.

Glee

Belt a note, sing your heart out and do a little dance! Inspired by the hit television show "Glee", you will be part of a performance where the emphasis will be on popular songs, group vocal harmonies, movement, staging and fun!

Naturally Curious

Take a closer look at the world outside your doorstep! Go on an insect safari, play some cool interactive nature games, make some nature crafts, learn how to be a nature detective, and become more aware of the wildlife that shares our city with us! This program will run outdoors, rain or shine.

Ready, Set, Cook

Continues to offer the basics of food preparation and cooking. Participants will eat their daily creations and take home a recipe book at the end of each session.

Scooter Skills

New to scooting? Learn the basic skills to safely ride a scooter and practice fun tips and tricks while exploring the local geography.

Tech Fanatics!

Come join us to explore the world of technology where we will checkout coding, robotics, and circuitry. Create something out of nothing.

Triple S

Get creative with pictures, fabric, and fiber! In Triple S, participants will design a personalized scrapbook using photos and memories, learn basic hand-sewing and embroidery to create trendy crafts, and explore string arts like knotting, bracelet-making, crochet, or knitting. This hands-on elective is all about creativity, self-expression, and making one-of-a-kind pieces to take home.

Wacky Science World

Get ready to enjoy a week jam-packed with discovery and exploration through themed, hands on activities in the wonderful world of science. Developed for budding scientists, participants will learn new and exciting concepts that will excite the scientist at heart.
