Introduction

The 2015-2019 Capital Strategy identifies new schools, additions to schools and replacement school requirements and will serve as the basis for the Board's multi-year capital funding request to the Ministry of Education.

The goals of the Capital Strategy include:

- To provide community schools for all students wherever possible
- To provide permanent accommodation to match sustainable community growth in a timely fashion
- To minimize the reliance on portable accommodation as funding permits
- To replace older school facilities where conditions warrant
- To utilize excess capacity within the system wherever practical

For more than two decades, the York Region District School Board has experienced significant enrolment growth in both the elementary and secondary panel. During peak years of growth the Board averaged an annual rate of 3.5% to 5.5% growth in the elementary and secondary panel. In the past five years, the average rate of enrolment growth at the elementary panel has begun to soften to 2.1%. Moderate growth in the elementary panel has occurred due to population growth from residential development and significant interest in the French Immersion program. In the secondary panel the five year average rate of growth was -0.5% reflecting a change in demographics throughout the Region.

The Ministry of Education has identified that 53 of 72 school boards in the province are experiencing enrolment decline. In York Region, it is projected that the elementary panel will continue to experience an average growth rate of 1.5% over the next five years. The secondary panel is projected to rebound with an average growth rate of 1.25%. Part of this growth can be attributed to optional programs that are offered by the Board, such as Arts, French Immersion, Gifted, International Baccalaureate and Athletics.

The York Region District School Board utilizes portables to provide additional accommodation for students, where schools experiencing a high rate of growth in enrolment will surpass the built capacity of the school. Once peak enrolment within a school community has been reached, portables can be relocated as needed. For areas of new development, portables are also utilized at designated holding schools to accommodate students until a viable threshold is reached for new school construction.

The impact of Primary Class Size, the implementation of Full Day Kindergarten and changes to the ministry capital funding model are all factors which contribute to the use of portables in addressing accommodation pressures.

There are currently 174 elementary schools and 32 secondary schools operating in the York Region District School Board. As of October 2014, the elementary panel was operating at 91% utilization and the secondary panel at 96% utilization.

Effective utilization of schools has been identified as an area of focus by the Ministry of Education, through their School Board Efficiencies and Modernization initiative. Accordingly, this document includes a summary of small schools and underutilized schools for planning and potential partnership purposes.

Summary of Capital Recommendations

For Submission to the Ministry of Education

* Proposed Opening	Project Name	Municipality	Capacity
2017	Stouffville SE ES	Whitchurch-Stouffville	615
2017	Cathedral #2 ES (Dual FI)	Markham	615
2017	Charles Howitt PS (Addition)	Richmond Hill	TBD
2018	E.J. Sand PS (Replacement)	Markham	TBD
2018	Block 12 ES	Vaughan	615
2018	Cornell #4 ES	Markham	615
2018	Sharon PS (Replacement) / New School	East Gwillimbury	TBD
2019	Block 11 SS	Vaughan	TBD

* Subject to Ministry and Municipal Approvals

Emerging Projects listed in alphabetical order

Glossary of Terms

Attendance Area (also referred to as a School Boundary)

Each school has a defined attendance area, appropriately sized to accommodate sustainable student enrolment. Attendance areas are subject to change based on enrolment trends, construction of new schools, program changes and alignment of elementary and secondary boundaries. The following are considerations which may affect where students attend school: programs for exceptional students, optional programs, student transfers, and students directed to attend a school other than the community school because of overflow, enrolment pressure, primary class size, a holding school situation, school capacity and/or exceptional circumstances. The physical school boundary is defined by geographical features including, but not limited to, roads, railway tracks, rivers and land parcels.

Capacity (OTG)

The On-The-Ground Capacity (OTG) is the capacity for a school calculated by average room loadings. The capacity is based on the physical building and does not include portables. Each type of classroom in a school has a student loading assigned to it (ranging from 9 to 26) which added together gives the Ministry of Education a rated capacity of a school. The OTG capacity does not necessarily represent the physical space limit of a school. The elementary school capacities referenced in this document reflect OTG capacities and the secondary school capacities reflect OTG capacity plus an additional 10% to reflect the York Region District School Board loading practice.

French Immersion (Single Track, Dual Track, Primary Dual Track)

Within the York Region District School Board, French Immersion (FI) is an optional program that consists of full-day French instruction starting in Grade 1, at a designated school. A single track French Immersion school is a school that only offers French Immersion programming. A dual track school accommodates students in both the Regular and French Immersion program. A primary dual track (PDT) is similar to a dual track school, however a PDT school only serves French Immersion students from primary grades who then continue to a nearby French Immersion school for the balance of their elementary grades.

Greenfield

An area that is undeveloped and/or not built-up.

Holding Area

A geographically assigned portion of a boundary to be temporarily accommodated in a nearby school. Holding areas are not considered part of the permanent long-term attendance area. A holding area may be created to accommodate students for an interim period. [Policy #108.0, Student Accommodation – Attendance Areas and Student Transfers](#).

Holding School

A holding school is a school at which students are attending until long-term accommodation is available and is not part of the student's attendance area. Examples of holding school situations include, but are not limited to, enrolment pressure, construction of a new school or renovation of an existing community

school. [Policy #108.0, Student Accommodation – Attendance Areas and Student Transfers](#).

Planning Area

The York Region District School Board services a large geographic area and the Board operates hundreds of schools. To effectively review the accommodation needs of schools, planning areas were defined for both the elementary and secondary panel. A planning area uses municipal boundaries and other geographic features such as major roads and waterways to divide one area from another. Some planning areas in this document have been grouped or divided for the purposes of map/page display and may not reflect the Board's review areas used in the 2014 Education Development Charge (EDC) background study.

Portables

A portable classroom provides flexibility for a school to accommodate more students than the built school allows. When enrolments fluctuate quickly, portables can ensure students are accommodated at their local school. In a new school community, portables will be required to accommodate students over a period of time when enrolment peaks. Once a school community ages and enrolment declines, portables can be easily removed and relocated to other schools in the Board, where required. The York Region District School Board utilizes a mix of single classroom portables, as well as groupings of 2 or more classrooms.

Secondary Plans

Secondary Plans are long range municipal planning documents which direct major infrastructure such as: arterial roads, servicing, schools and community parks.

Small School

An elementary school with a total enrolment of 200 students or less.

Urban boundary

The limit of where settlement and development can occur within the region as defined in the York Region Official Plan.

Utilization

A measurement that compares the total enrolment of a school to the OTG capacity of the school.

Whitebelt

Undeveloped lands outside of the urban boundary unencumbered by regulatory or environmental constraints for development.

Regional Trends

Elementary Summary

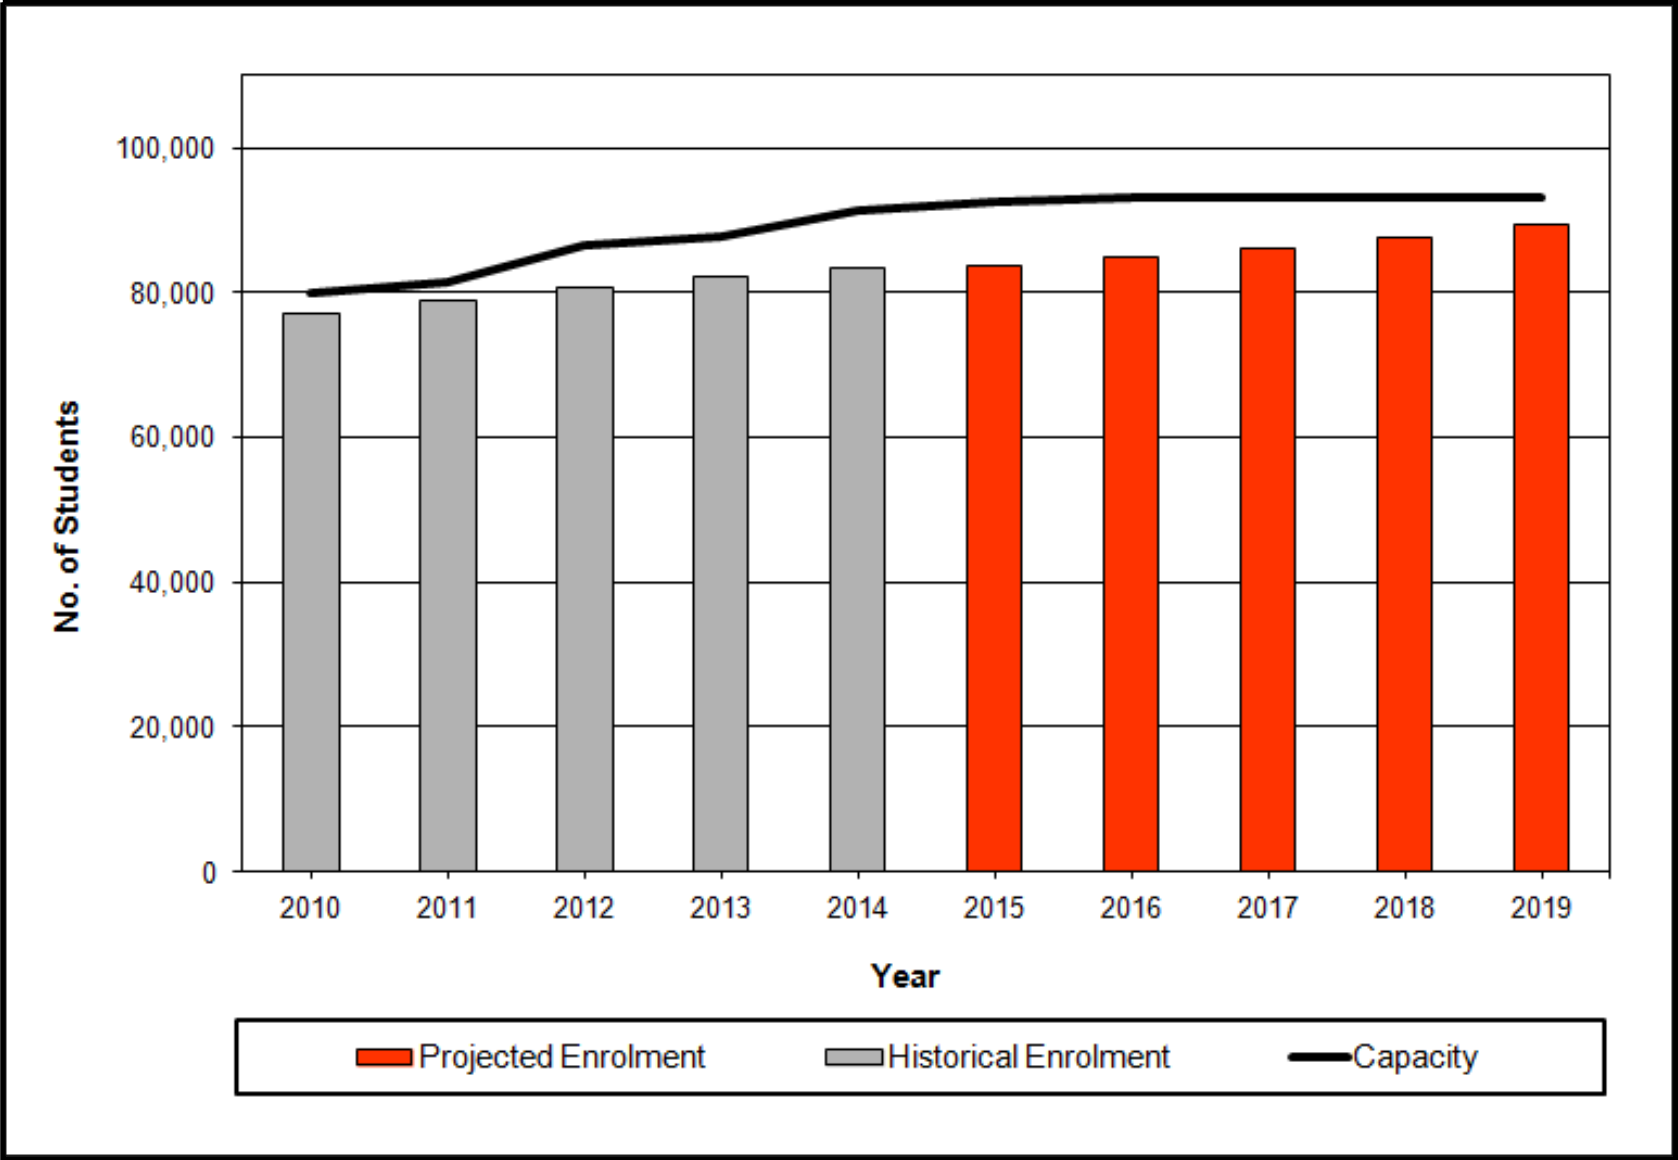

The number of elementary students enrolled with the York Region District School Board has been steadily growing for many years at a rate of 1.3% to 2.5%.

The main factors contributing to growth have been population growth from residential development and high participation in the French Immersion program.

Growth in the elementary panel during the 2015 to 2019 time period is projected to continue to rise as planned new development occurs in the Region.

The five year enrolment projection is predicated on current enrolment trends, program location and pace of new development.

Elementary Enrolment

	Historical Enrolment					Projected Enrolment				
	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Total Enrolment	76,948	78,864	80,606	82,227	83,300	83,641	84,737	86,078	87,536	89,359
Total Utilization	96%	97%	93%	94%	91%	91%	91%	93%	94%	96%

Regional Trends

Secondary Summary

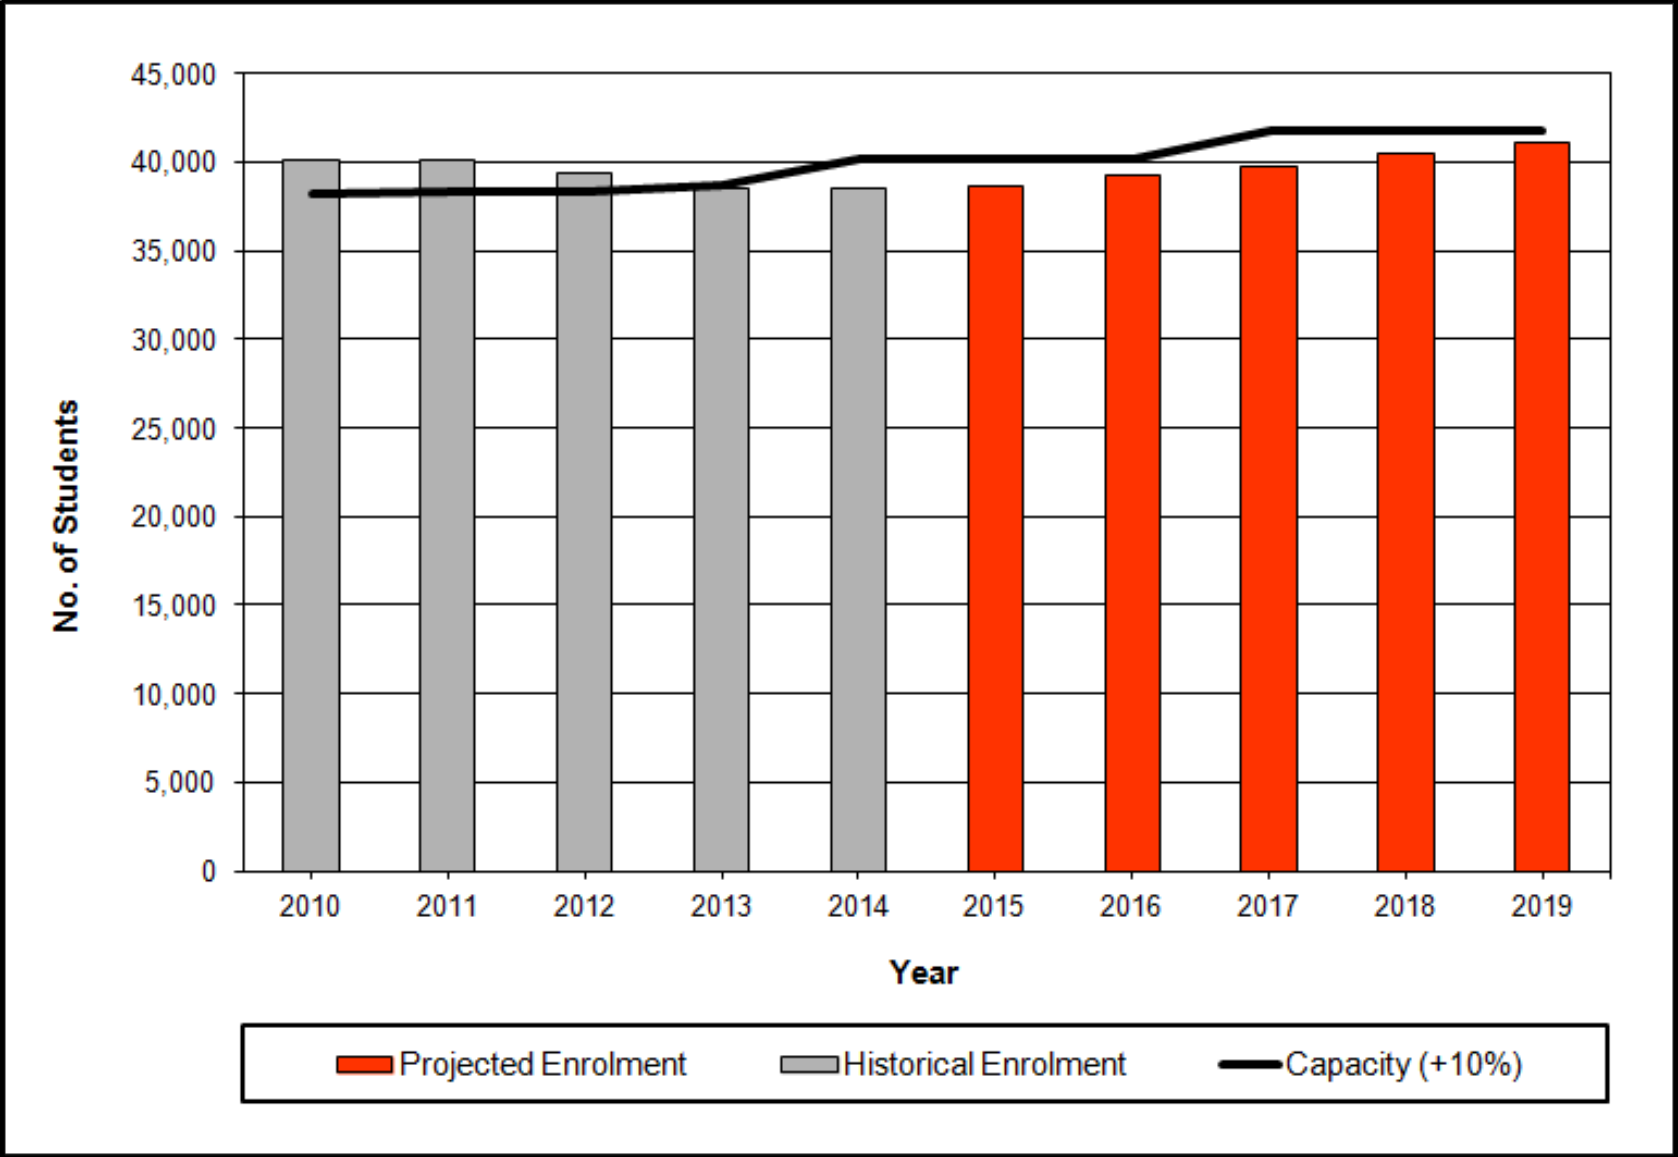

The number of secondary students enrolled with the York Region District School Board was growing for many years at a rate of 1.0% to 3.0%, until 2011, when the growth rate dropped to -0.05% to -2.0%.

As of 2014, the Board began to experience a growth in secondary enrolment; a trend that is projected to continue over the next few years.

The five year enrolment projection is predicated on current enrolment trends, program location and pace of new development.

Additional secondary pupil places have most recently been built in Vaughan (Tommy Douglas SS opened in 2014) with a future school proposed to open in Markham for 2017 (Unnamed Cornell SS).

Secondary Enrolment

	Historical Enrolment					Projected Enrolment				
	2010	2011	2012	2013	2014	2015	2016	2017	2018	2019
Total Enrolment (FTE)	40,168	40,145	39,341	38,560	38,566	38,620	39,296	39,744	40,464	41,059
Total Utilization (+10%)	105%	105%	103%	100%	96%	96%	98%	95%	97%	98%

Note: FTE is the full-time equivalent enrolment

Regional Trends

Small Schools

Small elementary schools are defined as those schools with an enrolment of 200 students or less. As of October 2014, the York Region District School Board has 7 small elementary schools with an average enrolment of 123 students. Projected enrolment indicates that the number of small schools will remain stable out to 2019-20.

From an operational and financial standpoint, small schools can be challenging to staff as funding is mainly enrolment based. Small school enrolments may not equate to full-time staff in areas such as school administration or librarians. From a program perspective, small grade cohorts can create challenges for organizing classes that meet Ministry of Education class size targets and averages, and can result in a combined class of three grades. The Ministry of Education is now encouraging school boards to ‘right-size’ their school facilities by providing school consolidation funding. As part of the Ministry’s School Board Efficiencies and Modernization initiative, the ministry’s goal is to have funds directed toward student achievement, and to maximize the efficiency of all school facilities. Provincially, the sustainability of providing financial support to small schools will be an important factor in the future when declining enrolment contributes to an increase in the number of small schools.

Schools with 100 students or less are classified as very small schools by the Ministry of Education. Within the GTA, there are almost 70 very small schools (School Board Efficiencies and Modernization Consultations, Ministry of Education, October 2013). Three of these schools (4%) are within the York Region District School Board.

Five of the seven small schools listed in the table to the right do not operate a full JK-8 model. Students from these schools flow to nearby schools for the balance of their elementary grades. The opportunity to rebalance enrolment by adding a grade at the lower enrolled school is dependent on the enrolment impact at both the sending and receiving school, and the classroom facilities such as science and art rooms available.

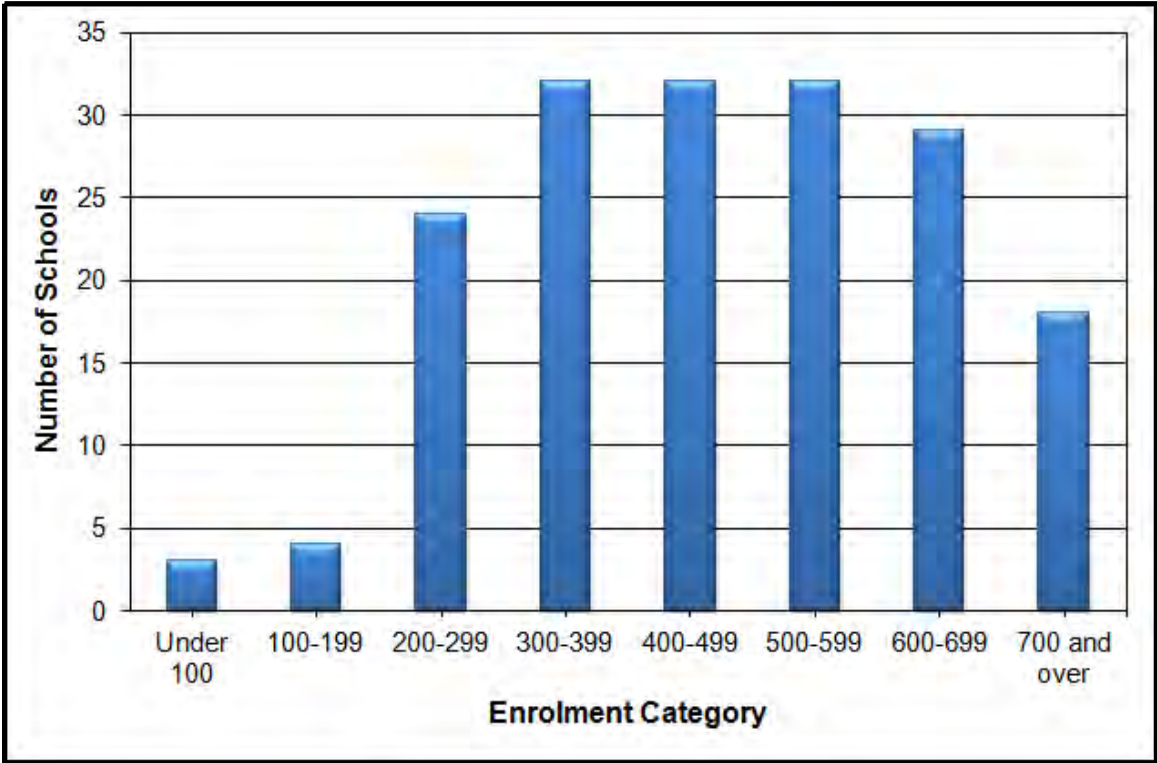

The list of small schools as of October 2014, will continue to be reviewed for opportunities to support program for these smaller schools. For example, the George Street PS enrolment will move to Aurora Senior PS effective September 2015. Queensville PS will eventually be expanded or replaced once new growth occurs in the local community.

List of Small Schools, October 2014

School Name	Grade Structure	Category
Deer Park PS	JK - 8	Small
George Street PS*	JK - 3	Small
J.L.R. Bell PS	JK - 5	Very Small
Kettleby PS	JK - 8	Small
Queensville PS	JK - 6	Very Small
Schomberg PS	JK - 6	Small
Stornoway Crescent PS	JK - 6	Very Small

*George Street PS students to attend Aurora Senior PS beginning September 2015.

Number of Elementary Schools by Enrolment Category, October 2014

Regional Trends

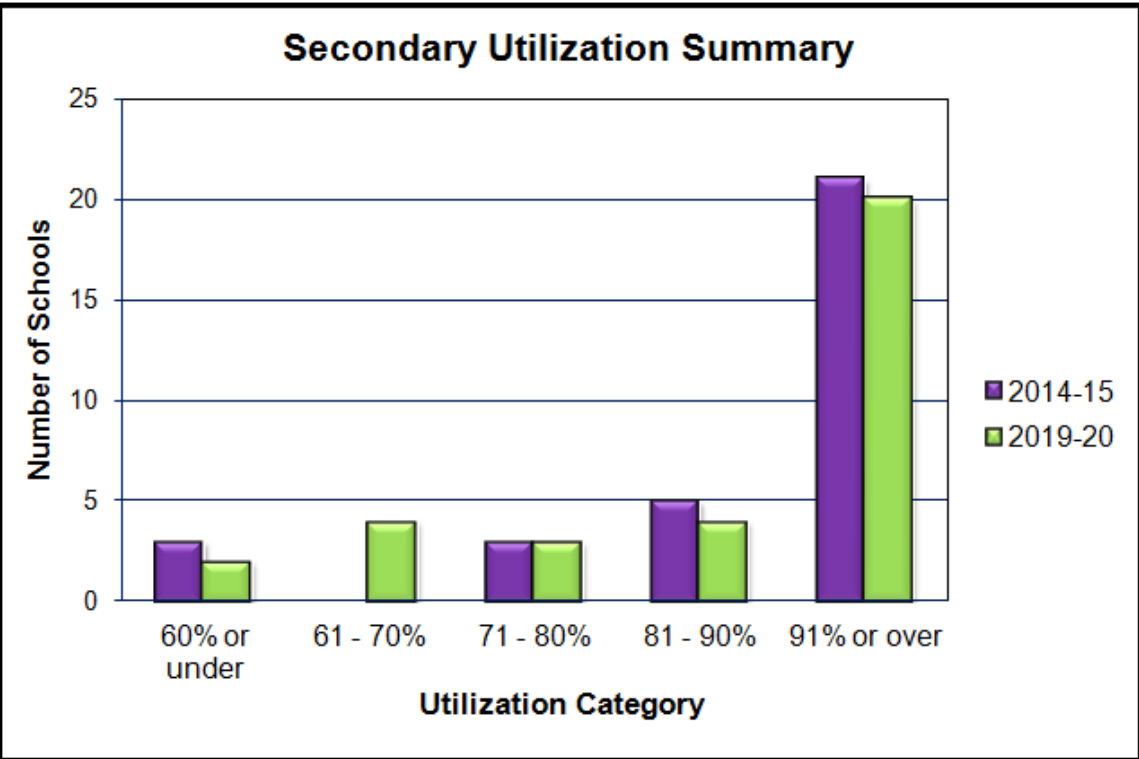

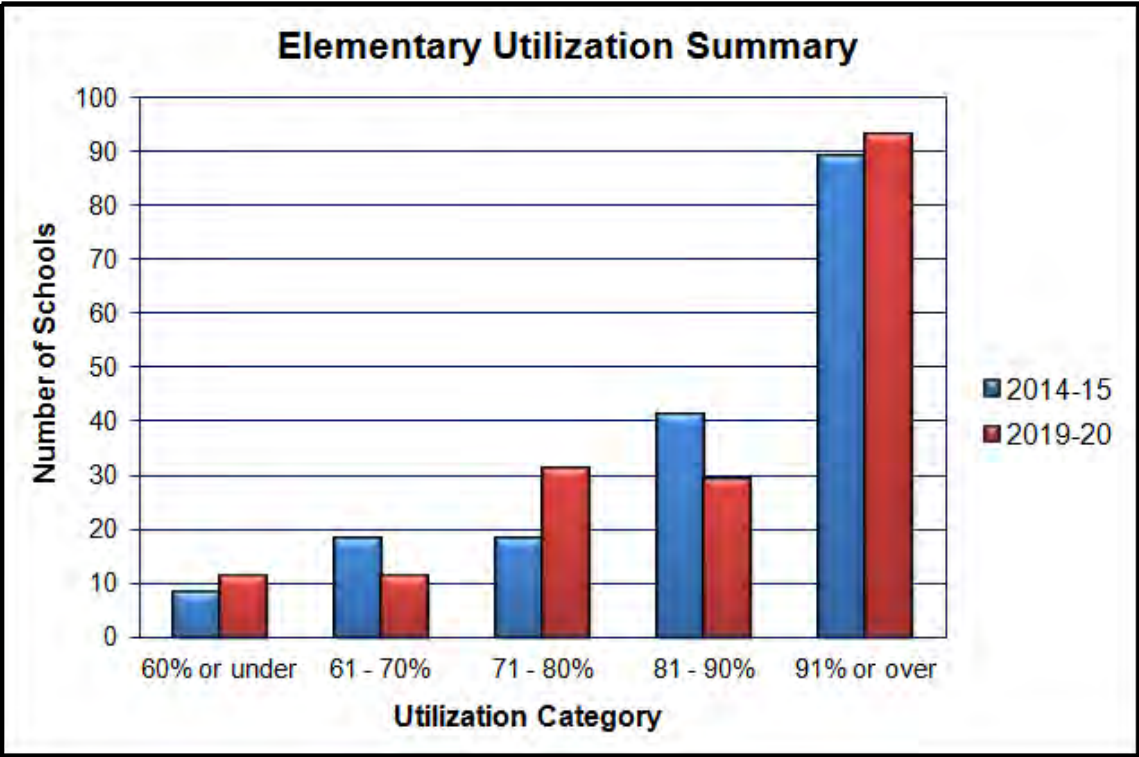

School Utilization

In 2013, the Ministry of Education introduced their School Board Efficiencies and Modernization Strategy. Based on this strategy, the 2014-2015 Grants for Student Needs (GSN) included changes to financial supports for underutilized school space; revisions to the school closure policy; investments in the School Consolidation Capital program to support efficient use of school space, and investments in Capital Planning Capacity.

School utilization is a calculation of the enrolment as a percentage of the OTG capacity of a school (excluding portables). As of October 2014, the elementary panel overall was operating at 91% and the secondary panel at 96% utilization.

The Ministry of Education defines underutilized schools as those schools with a utilization rate of 60% or lower. In their Facility Partnerships guideline, the Ministry of Education uses 60% utilization to identify schools where there may be partnership opportunities.

Current and projected utilization rates for all Board schools are provided in Appendix 3 of this report. Using the 60% benchmark, there are 11 underutilized elementary and secondary schools in 2014-15. The Board has employed specific strategies to address underutilized space, where possible. For example, directing students from new residential development; adding programs such as French Immersion or Gifted where enough space is available, and a threshold to begin a new program has been reached; developing a partnership policy to support future partnerships with other agencies and government with a view to providing services in schools that support the needs of students and the broader community. The Board's partnership policy allows for suitable agencies to lease existing space or co-build when a new school is proposed. Appendix 2 provides detail on the partnership process.

Regional Trends

French Immersion

Over the past decade, interest in the French Immersion program at the elementary panel has more than doubled. In 2004, 4,818 students were enrolled in French Immersion and in 2014 the program grew to 11,052 students. This represents an increase of 129% over the past ten years. Grade 1 registration has increased from 873 to 1,885 students. Utilizing primary class size guidelines, this would require the creation of approximately 89 to 94 grade 1 classes. Due to this substantial growth, long term accommodation strategies for French Immersion have been challenging.

In 2012, the York Region District School Board undertook a review of French as a Second Language. This was a comprehensive review of both Immersion and Core French delivery. From this review, a set of accommodation goals were established to provide guidance for long term accommodation planning.

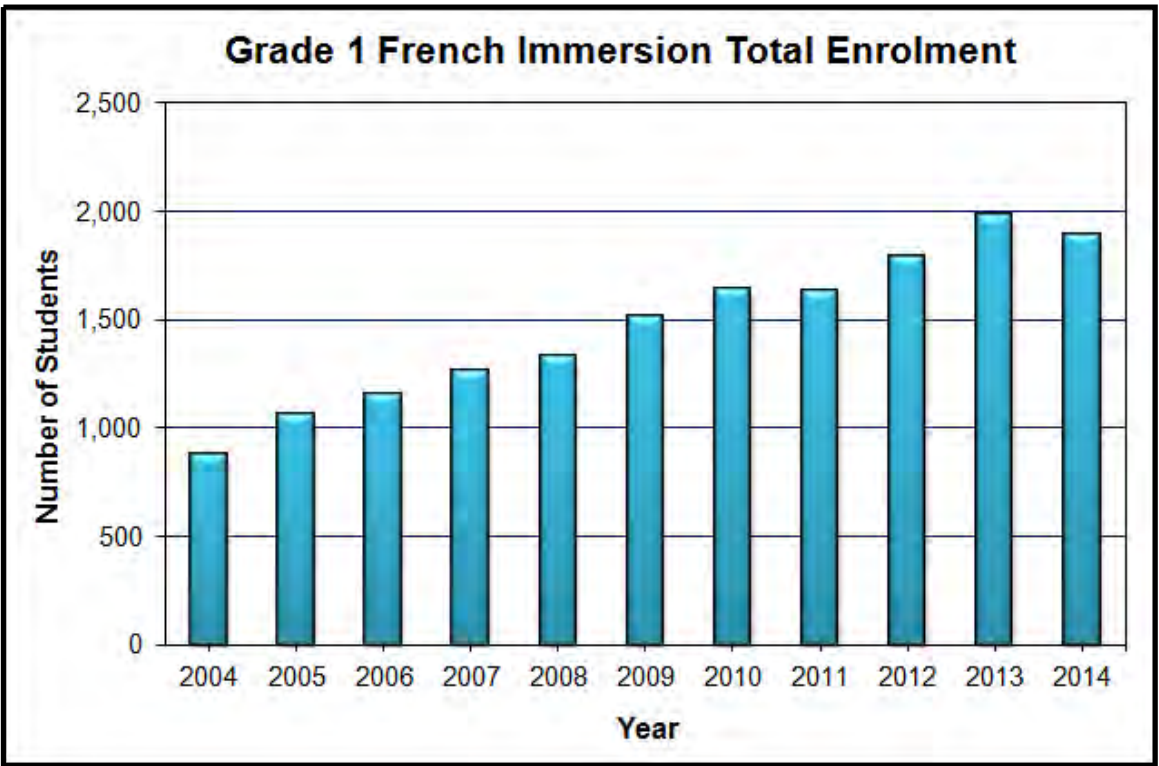

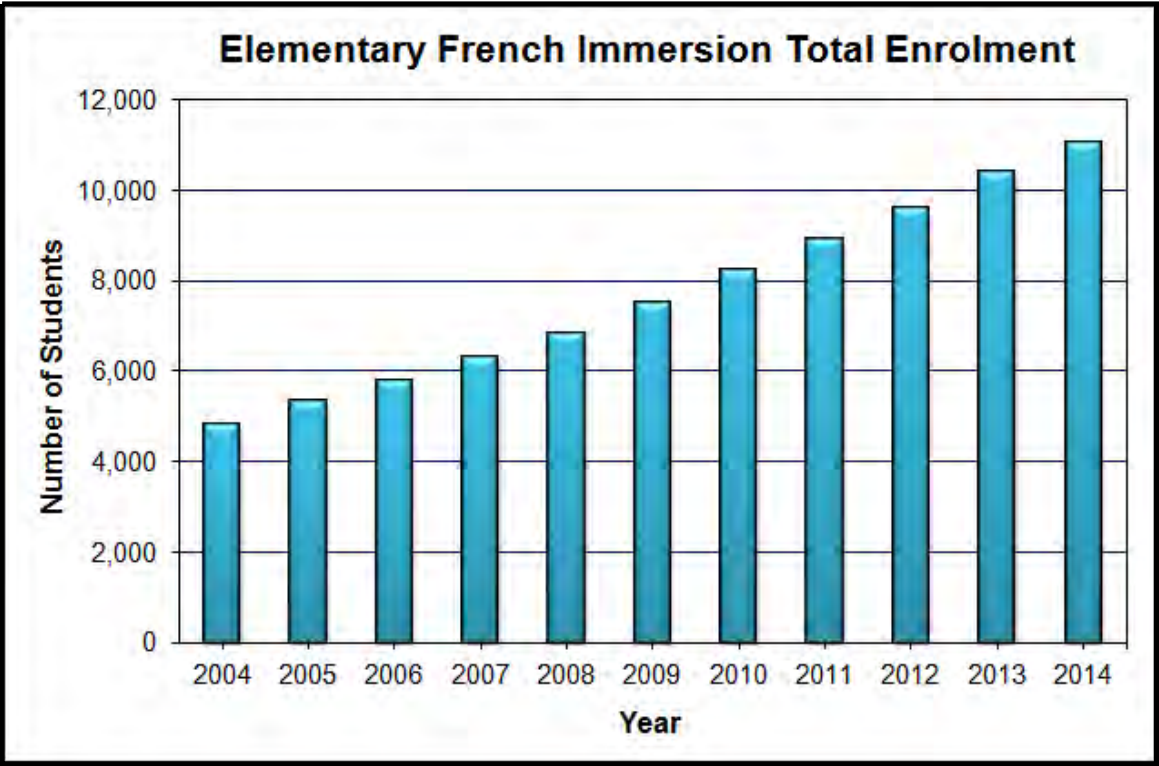

These goals were as follows:

- Use existing pupil places where available
- French Immersion and Regular enrolment to be balanced at dual track locations
- Address French Immersion demand from new residential growth
- Build one pupil place per child to address new growth

Trustees also recommended that entry into French Immersion be maintained at grade 1 and that the program be available to all students that wish to attend. The above guidelines and recommendations created the under pinning's of an accommodation tool-kit that was adopted through the French as a Second Language review to ensure that student accommodation was available.

The Accommodation Tool Kit includes offering Immersion in Dual Track or Single Track settings, in a variety of configurations. This means that students may begin the Immersion program in one location at a Primary Dual Track site but continue at a different location for the balance of their elementary grades. This structure provides the Board the flexibility to address accommodation needs locally, utilize existing pupil places within the community and balance French Immersion and Regular enrolment at dual track locations.

The first Primary Dual Track sites opened in September 2013, providing accommodation to 593 students in six schools. In September 2015, over 1,300 students are projected to be accommodated in Primary Dual Track settings in ten schools throughout the region. Utilizing the Primary Dual Track format will enable the Board to accommodate 65 additional French Immersion classes this fall.

Regional Trends

Development Summary

From York Region’s 2013 Growth and Development Review, population in the Region increased by 21,800 people in 2013 to 1,130,400 people. This accounts for a 22.5% share of the Greater Toronto and Hamilton Area’s (GTHA) population growth and 15.9% of total population of the GTHA. The Region is on track to meet the 2031 population target of 1,500,000 people.

A majority of the population growth has occurred in the municipalities of Markham, Vaughan and Richmond Hill where most new schools have been built in the last 5 years. Markham and Vaughan alone accounted for approximately 73% of total residential building permits in 2013.

New Residential Communities

In accordance with provincial policies, the Region is required to have at least 40% of new residential units be located in existing built up areas and built at a higher density. The majority of high density residential units should occur near major roads and transit areas, and resemble unit types such as apartment buildings or stacked townhouses. A portion of the 40% may also include infill and brownfield redevelopment within the community.

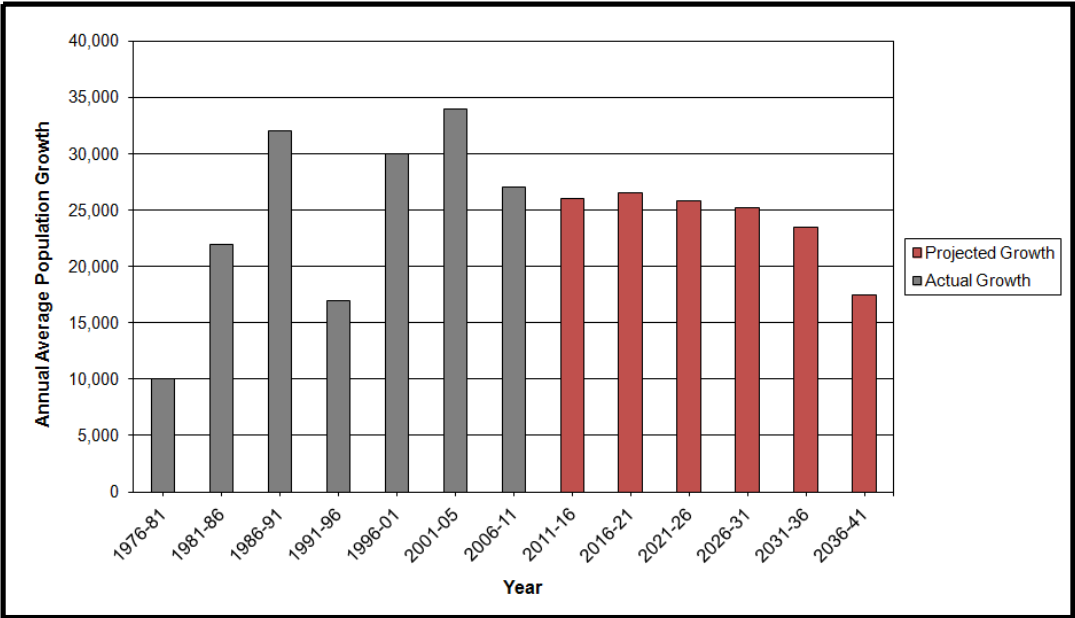

In order for the Region to achieve the projected population target, development is anticipated to occur both within and outside the Regions’ current defined urban boundary.

Of the total required new residential units, 41% can be accommodated on undeveloped lands within the urban boundary. Many of these undeveloped lands are already in proposed and circulated residential development plans. Additional undeveloped lands outside the urban boundary (commonly referred to as Whitebelt Lands) may be required to achieve the Region’s unit growth target. Please refer to the chart on the right.

Whitebelt lands are undeveloped vacant sites located outside the Region’s current defined urban boundary and unencumbered by restrictions on development, such as the Oak Ridges Moraine Act or Places to Grow Act. These lands will be required to serve the population growth that cannot be accommodated in intensification areas or vacant lands already within the urban boundary. The Region reviews the need to expand the urban boundary through a Growth Management Review, and if required, the location and amount of lands to be added to the Region’s urban boundary will be reflected either through an amendment or update to the York Region Official Plan.

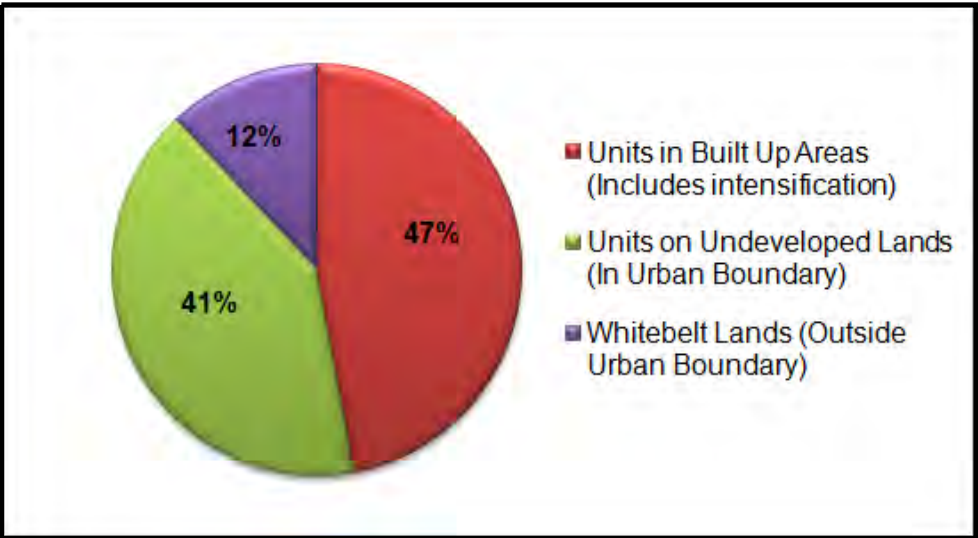

The majority of whitebelt lands in York Region are located in the municipalities of East Gwillimbury, Markham and Vaughan, which together account for 90% of the total whitebelt lands in the Region. Approximately 1,400 hectares of residential lands accommodating over 27,000 residential units are projected to be required within the whitebelt in order to achieve the Region’s 2031 population target. The current whitebelt land requirements by municipality are shown on the right.

Total Utilization	89%	89%	96%	104%	111%	115%

Area Summary

- There are 4 elementary schools in the planning area with a total capacity of 2,263 pupil places and a 2014 enrolment of 2,003 students. Enrolment is projected to increase to 2,612 students by 2019 which represents an overall utilization of 115%.
- An FI Primary Dual Track program was created at Aurora Grove PS in 2013. Grade 3-8 FI students attend Lester B. Pearson PS.
- Approximately 2,800 low and medium density residential units are proposed for this area with occupancy expected to begin by 2016.
- With this new growth, enrolment begins to exceed capacity in 2017.
- The Aurora 2C ES site designation is located in this planning area; site purchase will take place in 2015.

Recommendations

- A new elementary school will be required to serve new development in Aurora East / South Newmarket areas. The opening date will be determined once a threshold of students has been reached.

Aurora West Elementary

School Enrolment

Total Utilization	75%	77%	76%	75%	75%	77%

Area Summary

- There are 7 elementary schools located in the planning area with a total 2014 capacity of 3,405 pupil places and a 2014 enrolment of 2,556 students.
- In September 2015, George Street PS (JK-3) students will be moved to Aurora Senior PS. The capacities for Aurora Senior PS and George Street PS have been adjusted accordingly.
- Total enrolment in the planning area is projected to remain stable to 2019; Lester B. Pearson PS and Highview PS will both increase in enrolment, while Devins Drive PS and Regency Acres PS will continue to decline.
- Devins Drive PS opened as a FI Primary Dual Track in 2013. Grade 3-8 FI students attend Lester B. Pearson PS.
- Highview PS is currently holding an area of new residential development from the Lake Wilcox PS attendance boundary (Yonge Street & Bloomington Road).

Recommendations

- There are no projects planned for this area.

Total Utilization		70%	69%	73%	82%	97%	111%		

Area Summary

- There are 6 elementary schools in the planning area with a total capacity of 2,377 pupil places and a 2014 enrolment of 1,670 students. Enrolment is projected to increase from a current utilization of 70% to 111% by 2019.
- Over 10,000 new residential units are proposed for the communities of Queensville, Sharon and Holland Landing to be built over the next 10 years with occupancies beginning in 2016.
- Existing sanitary servicing is available for approximately 7,000 units between all three communities and construction of additional units will require the expansion of sanitary sewer infrastructure, which is not expected to be completed prior to 2024.
- Sharon has approximately 2,000 units proposed and servicing for approximately 1,700 units with occupancies starting in 2016.
- Queensville has over 7,000 units proposed and servicing for 1,500 units with occupancies anticipated to begin in 2017.
- Holland Landing has approximately 2,800 units proposed and available servicing with occupancies anticipated to begin in 2017.
- Approximately 10,000 low and medium density units along with 5,000 high density units have been proposed within the Green Lane Secondary Plan, which is located south of Sharon.
- Queensville PS is identified as a small school with a 2014 enrolment of 77 students.

Recommendations

- A new school / replacement for Sharon PS is proposed for 2018.
- Over the longer term, new elementary schools will be required to serve proposed development in the Queensville and Holland Landing communities. Opening dates will be determined once a threshold of students has been reached.

Georgina Elementary

School Enrolment

Area Summary

- There are 4 schools in the planning area with a total of 1,584 pupil places and a 2014 enrolment of 1,105 students. Enrolment is projected to increase slightly by 2019 with a total utilization of 74%.
- 2,500 new residential units are proposed with the majority in the community of Sutton.
- To date, the absorption rate of new units is low in comparison to other communities in the Region.
- Sutton PS will increase to its built capacity over the next 5 years as a result of new growth.
- Black River PS, Deer Park PS and Morning Glory PS are expected to continue to experience moderate decline in enrolment over the next 5 years.
- Deer Park PS was identified as a small school with a 2014 enrolment of 174 students in JK-8. By 2019, enrolment is projected to be 164 students.

Recommendations

- There are no projects planned for this area.

Total Utilization	83%	83%	83%	84%	85%	85%

Area Summary

- There are 7 schools in the planning area with a total of 3,475 pupil places and a 2014 enrolment of 2,870 students. Enrolment is projected to increase slightly by 2019 with a total utilization of 85%.
- Approximately 3,200 new units are proposed for Keswick with development to begin in the next few years, as a result of the completion of the Highway 404 extension and availability of water and wastewater services.
- Most development is occurring in the area of Ravenshoe Road & Woodbine Avenue in the Lake Simcoe PS attendance boundary (part of the South Keswick Secondary Plan).

Recommendations

- A new elementary school will be required to serve development located in the current Lake Simcoe PS boundary. The opening date will be determined once a threshold of students has been reached.

Area Summary

- There are 4 schools in the King City and Township area with a total capacity of 1,462 pupil places and a 2014 enrolment of 955 students. Enrolment is projected to increase from a current utilization of 65% to 79% in 2019.
- In King City, there are approximately 1,800 new residential units remaining to be developed. Students from new development will attend King City PS, and enrolment will slowly increase.
- In Nobleton, there are 600 to 700 new residential units remaining to be developed. Students from new development will attend Nobleton PS, which will result in an enrolment increase at this school by 2019.
- Schomberg PS is a JK-6 school with a current enrolment of 135 students which is projected to remain stable over the next 5 years. Grades 7-8 from the Schomberg attendance area attend Nobleton PS. Schomberg PS was identified as a small school.
- Kettleby PS has a 2014 enrolment of 177 students in a JK-8 program, and has been identified as a small school. Enrolment is projected to remain stable over the next 5 years.

Recommendations

- There are no projects planned for this area.

Area Summary

- There are 10 schools in the planning area with a total capacity of 3,904 pupil places and a 2014 enrolment of 3,863 students. Enrolment is projected to remain stable with a utilization of 98% by 2019.
- A limited amount of new development is expected in this planning area.
- James Robinson PS has been identified as a holding school for the Markham Centre West planning area (Highway 7 & Warden Avenue). A proposed new school for the Markham Centre West planning area will relieve future enrolment at James Robinson PS.
- Unionville PS accommodates students from a portion of the community northwest of 16th Avenue and Warden Avenue.
- Regular grade 7-8 students from Roy H. Crosby PS attend James Robinson PS, Gifted grade 7-8 students attend William Berczy PS.
- Reesor Park PS opened an FI Primary Dual Track program in September 2014. Grade 2 FI students will remain for 2015 and Franklin Street PS will accommodate grade 3-8 FI students.

Recommendations

- There are no projects planned for this area.

Area Summary

- There are 4 schools in the planning area with a total capacity of 2,072 pupil places and a 2014 enrolment of 2,195 students. Enrolment is projected to remain stable with a projected utilization of 103% in 2019.
- This area includes built and new high density development proposed in the Markham Centre community located south of Highway 7, east and west of Warden Avenue as well as new development proposed in the Village Parkway area located north of Highway 7, east of Warden Avenue.
- Students from the Markham Centre area are currently holding at Parkview PS and James Robinson PS.
- New high density development is also proposed as part of the redevelopment of the Buttonville airport lands.
- Even though student yield per household is lower for high density development in comparison to lower density housing, the total volume of high density proposed in this planning area will help sustain existing schools and require new pupil places to be built.
- Three future elementary school sites have been designated in this area.

Recommendations

- A new elementary school will be required to serve new development in the Markham Centre and Village Parkway area. The opening date will be determined once a threshold of students has been reached.

Area Summary

- There are 10 schools within the planning area with a total 2014 capacity of 5,282 pupil places and a 2014 enrolment of 5,674 students. Enrolment is projected to increase from current utilization of 107% to 111% by 2019.
- There are 3,200 low and medium density new residential units remaining to be developed within the planning area.
- 6,800 potential high density units are proposed along Highway 7.
- Schools within this area are currently operating at/above capacity.
- A number of new schools have been opened to serve new growth in this area, most recently Black Walnut PS in 2012, and Sam Chapman PS in 2010.
- Fred Varley PS will open in September 2015 as a Regular and FI Primary Dual Track school.
- Three future school sites have been designated.

Recommendations

- New School - Cornell #4 ES is proposed with an opening date 2018.
- An additional elementary school will be required to serve new development located along the Highway 7 corridor of this planning area. The opening date will be determined once a threshold of students has been reached.

Area Summary

- There are 7 schools in the planning area with a total capacity of 4,356 pupil places and a 2014 enrolment of 4,020 students. Enrolment is projected to increase from a current 92% utilization to 105% by 2019.
- There are 2,200 low and medium density units and 2,100 high density units to be developed within approved plans in this planning area.
- As part of the urban boundary expansion to serve population growth, an anticipated 12,000 low and medium density units are proposed for the area north of Major Mackenzie Drive.
- Recent new school openings in this area include Beckett Farm PS in 2014 and Sir John A. Macdonald PS in 2012.
- Sir John A. Macdonald PS opened as a FI Primary Dual Track in 2013. Grade 2-8 FI students attend Sir Wilfrid Laurier PS.
- A new school project is proposed to serve growth in the northern portion of the Cathedral community; students from this area are currently holding at Sir John A Macdonald PS.

Recommendations

- New School - Cathedral #2 ES Dual French Immersion school has a proposed opening date 2017.

Area Summary

- There are 14 schools in the planning area with a total capacity of 9,539 pupil places and a 2014 enrolment of 8,182 students. Enrolment is expected to remain stable with 87% utilization by 2019.
- There is a limited amount of remaining low density development which will occur in the Cedarwood and Box Grove areas (eastern part of planning area).
- New high density development is proposed in the vicinity of the Pacific Mall (Steeles Avenue E & Kennedy Road); however timing of new development in this location remains uncertain.
- In the last 3 years, additions were built at David Suzuki PS in 2014 and Cedarwood PS in 2012.
- An FI Primary Dual Track was opened at Coppard Glen PS in 2013. Grade 3-8 FI students attend Milliken Mills PS.

Recommendations

- There are no projects planned for this area.

Area Summary

- There are 10 elementary schools in the planning area with a total capacity of 2,958 pupil places and a 2014 enrolment of 2,883 students. Enrolment is expected to remain stable at 97% utilization by 2019.
- Schools in this area were built in an era of small, neighbourhood schools with 8 out of 10 schools less than 350 pupil places in size.
- High density development is proposed along major corridors in the area (Yonge Street & Steeles Avenue, and Highway 407 & Bayview Avenue).
- A replacement for E.J. Sand PS is proposed to create an anchor school to serve future high density development in the vicinity.
- In 2013, an FI Primary Dual Track was created at Yorkhill ES for students in grade 1-2 FI from Woodland PS. In 2015, Woodland PS will serve grade 4-8 FI and Yorkhill ES grade 1-3 FI students.
- Stornoway Crescent PS has a capacity of 127 pupil places with a current enrolment of 93 students in JK-5 and has been identified as a small school.

Recommendations

- Replacement School - E.J. Sand PS is proposed with an opening date of 2018.

Area Summary

- There are 6 schools in the planning area with a total capacity of 3,118 students and a 2014 enrolment of 2,567 students. Enrolment is expected to increase slightly by 2019, from a current utilization of 82% to a utilization of 86%.
- There are approximately 250 low density units remaining in the Newmarket Southeast development area. Students from this development area are currently holding at Bogart PS and Stonehaven ES.
- There are 140 proposed low density units within the Stonehaven community and the potential for some high density development in the Bogart community.
- Schools in the northern part of the planning area may assist in holding students from new development planned for East Gwillimbury.

Recommendations

- A new elementary school will be required to serve new development in southeast Newmarket / northeast Aurora. The opening date will be determined once a threshold of students has been reached.

Area Summary

- There are 6 schools in the planning area with a total capacity of 3,645 pupil places and a 2014 enrolment of 3,210 students. Enrolment is projected to increase moderately from a current utilization of 88% to a 2019 utilization of 94%.
- New residential development will occur in the boundaries of Crossland PS, Alexander Muir PS, and Phoebe Gilman PS, which includes a mix of low and medium residential units.
- New school sites have been designated in this planning area as a result of proposed new development located north and south of Davis Drive, as well as along Yonge Street.
- Phoebe Gilman PS is included in this planning area as it serves students from Newmarket and East Gwillimbury.

Recommendations

- There are no projects planned for this area.

Area Summary

- There are 8 schools in this planning area with a total capacity of 4,890 pupil places and a 2014 enrolment of 4,599 students. Enrolment is projected to increase moderately from a current utilization of 94% to 99% by 2019.
- Approximately 600 new units will be developed in the area south of Bloomington Road and east of Yonge Street; this area is currently holding at Highview PS in Aurora.
- There are 250 units remaining to be developed in the area east of Yonge Street and north of 19th Avenue; students from this area are holding at Silver Pines PS and Trillium Woods PS.
- Some infill development is occurring along major corridors as older larger lot properties are divided into smaller sized parcels.
- Approximately 3,000 units are proposed for development located east of Bayview Avenue in the Gormley area.

Recommendations

- New elementary schools will be required to serve new development in the southern part of the planning area with timing to be determined once a threshold of students has been reached.

Total Utilization		103%	103%	102%	102%	101%	102%		

Area Summary

- There are 7 schools in this planning area with a total 2014 capacity of 4,334 pupil places and a 2014 enrolment of 4,457 students. Enrolment is projected to remain stable in this area with a total utilization of 102% by 2019.
- An FI Primary Dual Track program will open at Doncrest PS in 2015 to accommodate students from Adrienne Clarkson PS. The capacity of Doncrest PS has been modified to reflect this change.
- There are small pockets of vacant parcels being developed along Bayview Avenue and within the Bayview Hill Community.
- There is potential for high density development along Highway 7.

Recommendations

- In the event that enrolment trends remain high, new pupil places will be required to accommodate students in this planning area.

Richmond Hill North Elementary

School Enrolment

Total Utilization		93%	87%	80%	77%	76%	80%		

Area Summary

- There are 3 schools in northern Richmond Hill with a total capacity of 1,911 pupil places and a 2014 enrolment of 1,775 students. Total enrolment will decline moderately from a 2014 utilization of 93% to a 2019 utilization of 80%.
- The eastern portion of the area includes new development in the Leslie Street corridor, north of Elgin Mills Road. There are approximately 4,500 low and medium density units proposed with development anticipated to begin within the next 5 years.
- The western portion of the area is predominantly built out; enrolments at these schools are sustained by students from adjoining growth communities.
- Both Silver Pines PS and Trillium Woods PS are holding students from the community north of Gamble Road / 19th Avenue, east of Yonge Street.

Recommendations

- New elementary schools will be required to serve new growth north of Elgin Mills Road along Leslie Street. The timing for the first new school will be determined once a threshold of students has been reached.

Total Utilization	91%	90%	92%	93%	94%	94%

Area Summary

- There are 10 schools in this planning area with a total capacity of 4,857 pupil places and a 2014 enrolment of 4,428 students. The enrolment will increase slightly from an overall utilization of 91% in 2014 to 94% by 2019.
- Approximately 500 new low density units are proposed within the Observatory Lands located north of Sixteenth Avenue PS.
- New high density development is proposed along Yonge Street and north of Highway 407 in the southern part of the planning area.
- As of September 2015, Ross Doan PS will accommodate JK-3 and Roselawn PS will accommodate grade 4-8.
- As a result of long-term enrolment pressure at Charles Howitt PS, an addition at this school is proposed.

Recommendations

- Charles Howitt PS Addition is proposed with an opening date of 2017.

Total Utilization		99%	97%	100%	103%	105%	108%		

Area Summary

- As of 2014, there were 8 schools in the planning area with a total capacity of 5,345 pupil places and a 2014 enrolment of 5,297 pupils. With the opening of Roméo Dallaire PS in September 2015, the total capacity for the area will increase to 6,022 pupil places. Total utilization for all schools will increase from 99% in 2014 to 108% in 2019.
- Approximately 1,050 low density units are proposed and under development in the Block 12 ES attendance boundary. Students from this boundary will be holding at Nellie McClung PS.
- Higher density development is proposed in the Dufferin Street & Rutherford Road and Bathurst Street & Rutherford Road areas.
- A number of new schools have opened to serve this planning area; most recently Anne Frank PS in 2014 and Nellie McClung PS in 2011.
- All schools within this area are currently operating at/above capacity. The number of new students from existing and new development remains high as this community makes its way through peak enrolment. A number of portables are being used for additional accommodation during this time.

Recommendations

- New School - Block 12 ES has a proposed opening date of 2018.

Total Utilization		86%	89%	97%	106%	116%	125%		

Area Summary

- This is a large planning area with one school located within its limits. Kleinburg PS has a capacity of 574 pupil places with a projected enrolment of 720 students by 2019.
- Students from the new development area are holding at Kleinburg PS & Pierre Berton PS.
- Approximately 5,400 units of low and medium density units are proposed for the communities of Nashville and the northern part of Kleinburg.
- Two future school sites have been designated within the Kleinburg-Nashville plan.

Recommendations

- New elementary schools are proposed in the Kleinburg / Nashville area to serve new development; the timing of the first school will be determined once a threshold of students has been reached.

Area Summary

- There are 7 schools in this planning area with a total capacity of 3,663 pupil places and a 2014 enrolment of 3,764 students. Enrolment is projected to decline slightly from a total utilization in 2014 of 103% to 92% in 2019.
- An FI Primary Dual Track was opened at Joseph A. Gibson PS in 2013. Grade 2-8 FI students attend Julliard PS.
- High density units are proposed within the Vaughan Metro Centre area which is located in the southern part of the planning area in the vicinity of Highway 7 and Jane Street, as well as Vaughan Mills Centre located at Rutherford Road and Highway 400. Development in the Vaughan Mills and Vaughan Metro Centre is anticipated to occur over an extended period of time.
- Future school sites have been designated in the Vaughan Mills and Vaughan Metro Centre areas.
- New development will occur in the northern part of the planning area as the City of Vaughan expands the urban boundary.

Recommendations

- There are no projects planned for this area.

Area Summary

- There are 10 schools in this planning area with a total capacity of 5,066 pupil places and a 2014 enrolment of 4,526 students. Enrolment is projected to decline slightly from an overall utilization of 89% in 2014 to 83% utilization in 2019.
- High density development is proposed along major road corridors in the planning area.
- Enrolment trends indicate that participation in the FI program remains strong, while regular track enrolment is experiencing some decline.
- Yorkhill ES opened as a FI Primary Dual Track in 2013, receiving FI students from Woodland PS. In 2015, Yorkhill ES will accommodate grade 1-3 FI students.

Recommendations

- There are no projects planned for this area.

Vaughan Vellore Elementary

Area Summary

- As of 2014, there were 4 schools in the planning area with a total capacity of 2,404 pupil places and a 2014 enrolment of 2,283 students. With the opening of Block 40 ES in September 2016, the total capacity for the area will increase to 3,019 pupil places. Total utilization for all schools will increase from 95% in 2014 to 97% by 2019.
- Approximately 2,300 low and medium density units are remaining to be developed in the northern portion of the planning area (Block 40 & Block 40/47).
- Pierre Berton PS is currently holding students from the Kleinburg-Nashville development area.

Recommendations

- Block 40 ES will open in 2016; this project was approved as part of the 2014 Ministry funding allocation.
- The timing of the next elementary school to serve this area will be determined once a threshold of students has been achieved.

Area Summary

- There are 5 schools in this planning area with a total capacity of 2,824 students and a 2014 enrolment of 2,437 students. Enrolment is projected to decline slightly from a current utilization of 86% to a 2019 utilization of 80%.
- Some high density redevelopment is planned in the core area, primarily along Kipling Avenue and Highway 7.
- Elder's Mills PS began a French Immersion program in 2009 as a dual track and became a single track French Immersion program in 2013.
- Currently, grade 1 FI students living in the boundaries of Glenn Gould PS, Vellore Woods PS, Discovery PS and Teston Village PS attend Elder's Mills PS. For grade 2-8, FI students attend Julliard PS.
- The regular track boundaries of Elder's Mills PS and Lorna Jackson PS were merged for September 2013.

Recommendations

- There are no projects planned for this area.

Area Summary

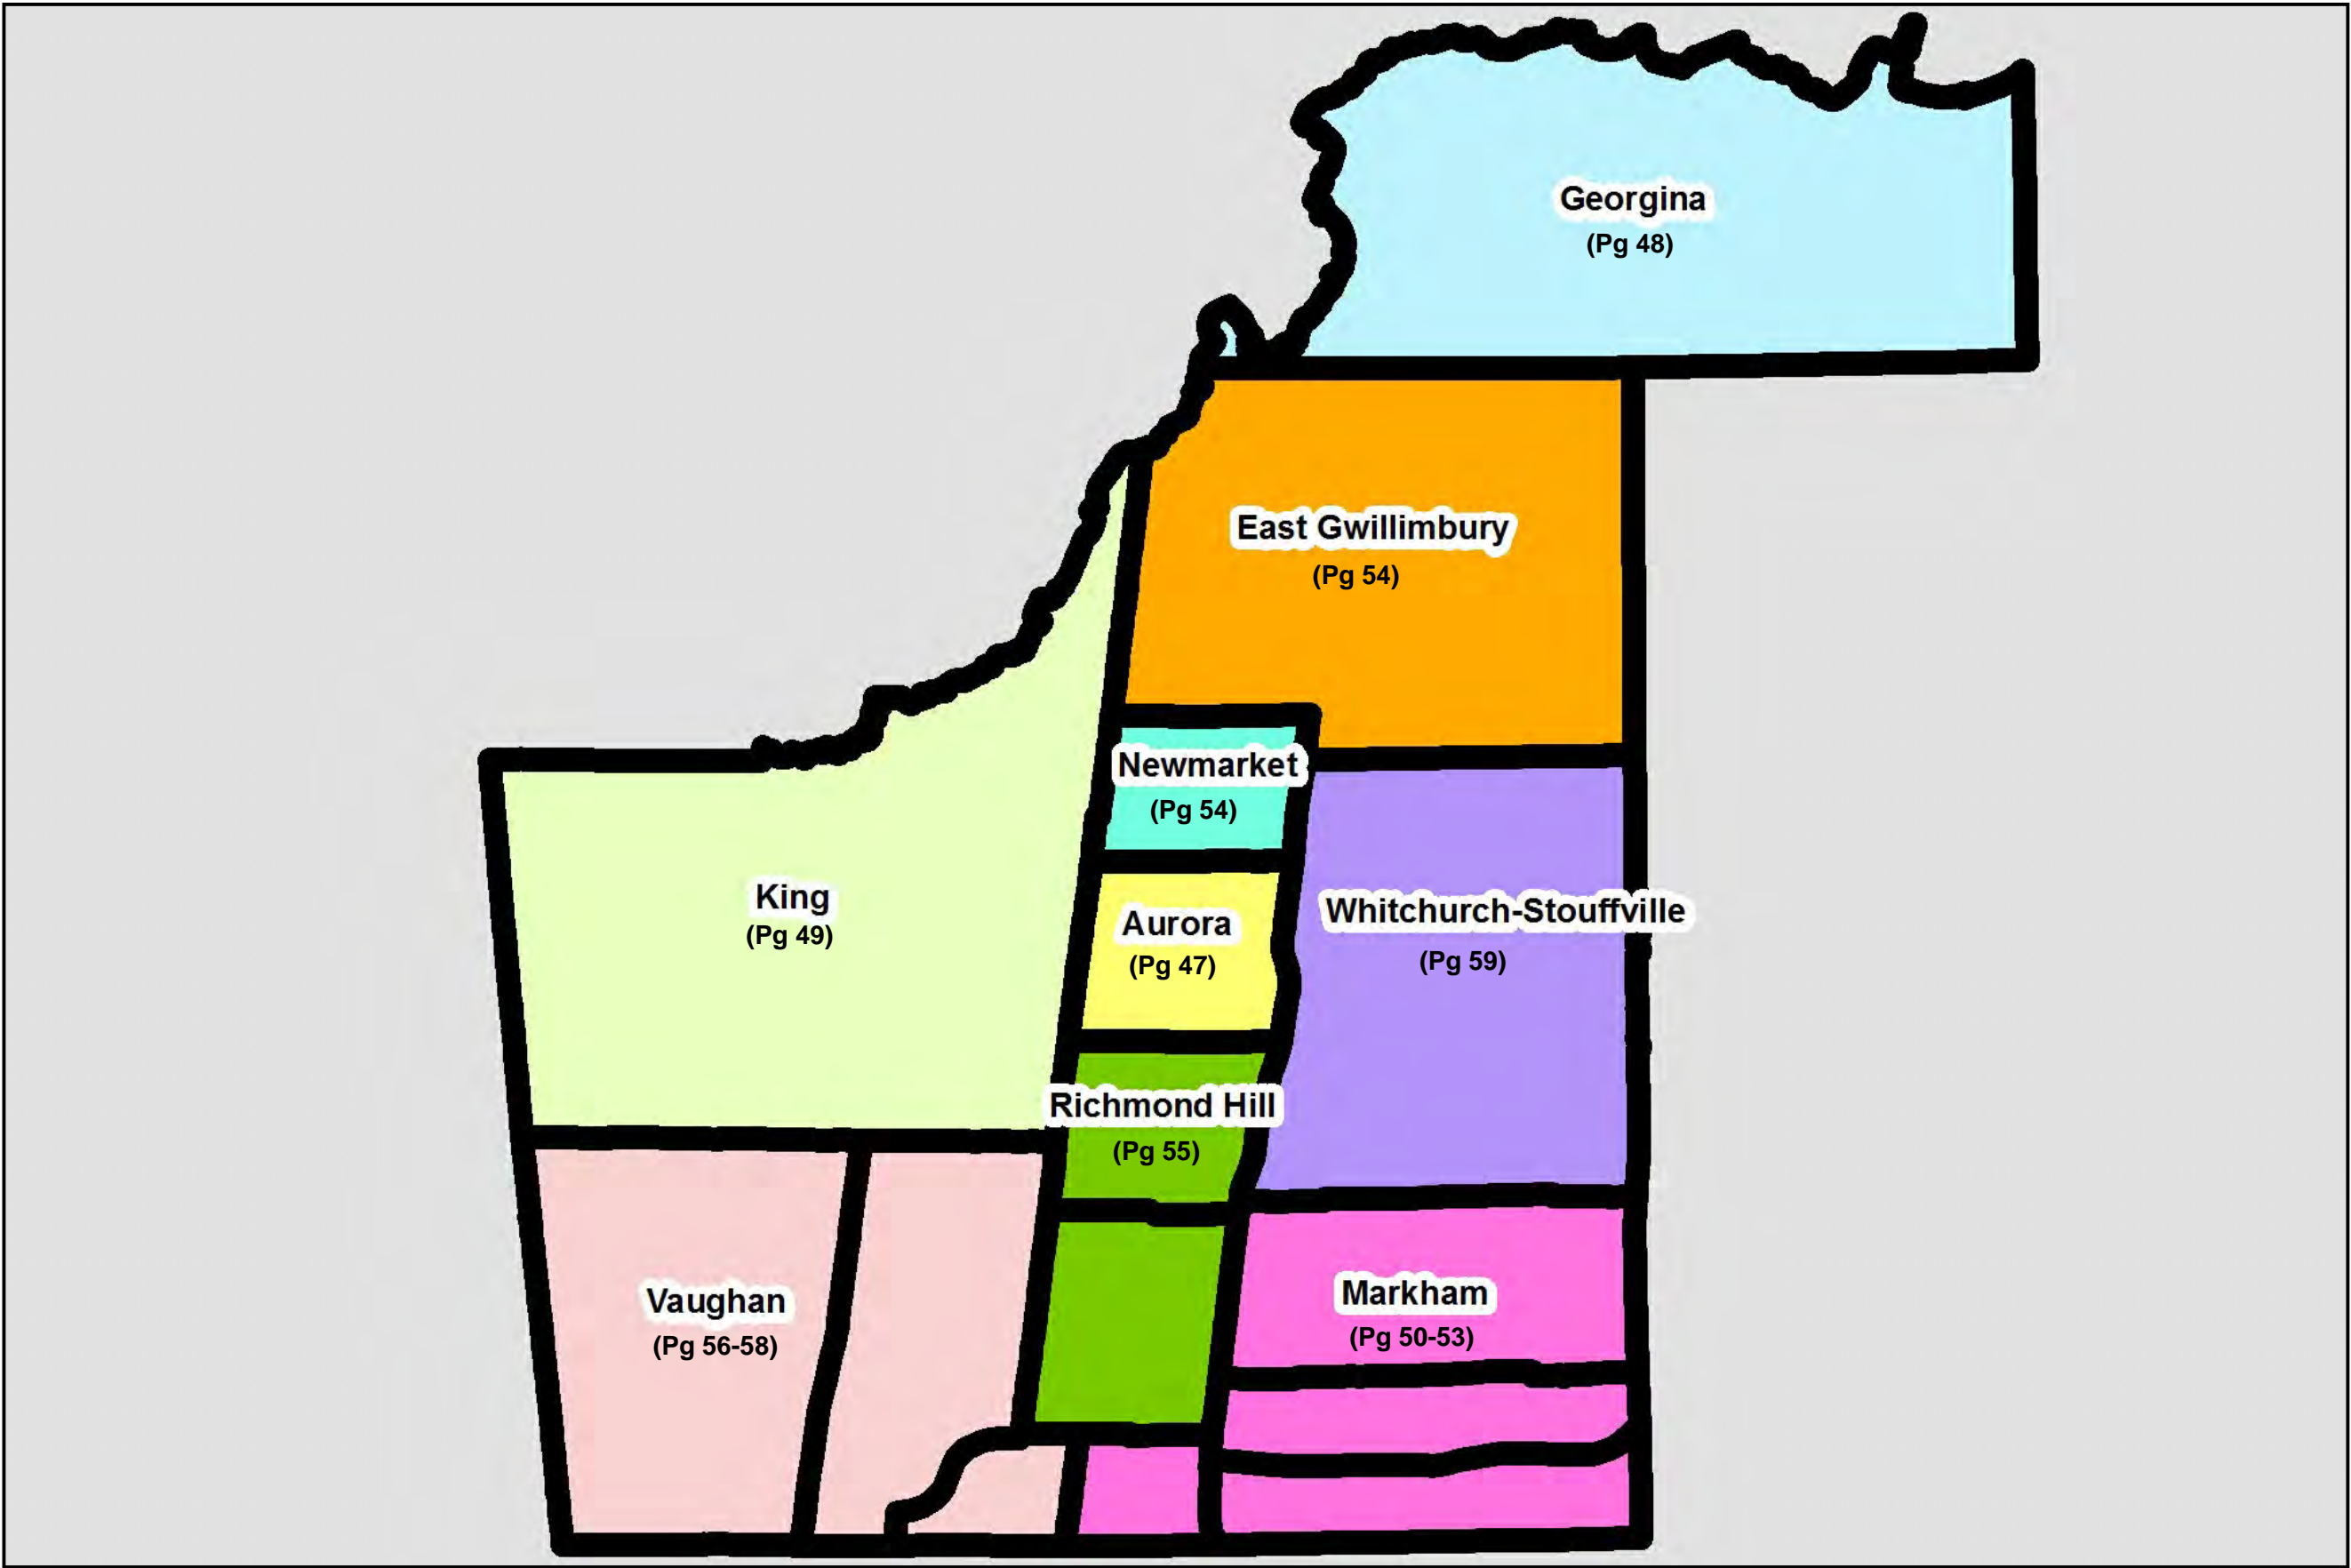

- There are 7 schools in the planning area with a total capacity of 3,616 pupil places and a 2014 total enrolment of 3,647 students. Enrolment is projected to increase from a current utilization of 101% to 134% in 2019.
- 1,050 new low density units remain to be developed in the southeast portion of Stouffville; a further 3,000 new units are proposed in the northern part of this community.
- A number of new schools have opened to serve growth in the planning area, most recently Wendat Village PS in 2012.
- As a result of high French Immersion enrolment at Glad Park PS, an FI Primary Dual Track program was opened at Summitview PS in 2014. In 2015, Summitview PS will serve grade 1-2 FI students.
- Schools within the community of Stouffville are currently operating at/above capacity due to high student yield from existing and new development.

Recommendations

- New school - Stouffville Southeast ES is proposed with an opening date of 2017.
- The timing of the next elementary school to serve proposed new development in the northern part of Stouffville will be determined once a threshold of students has been reached.

		2014	2015	2016	2017	2018	2019	2014	
Aurora HS	1,053	1,139	1,101	1,163	1,228	1,255	1,311	0	French Immersion
Dr G.W. Williams SS	1,195	854	800	760	766	772	768	2	Gifted
	2,248								
Total Enrolment		1,994	1,902	1,923	1,993	2,026	2,079		
Total Utilization		89%	85%	86%	89%	90%	92%		

Area Summary

The Town of Aurora is served by 2 secondary schools; Aurora HS and Dr. G.W. Williams SS. These two schools operate at a combined utilization of 89% increasing to 92% by 2019 due to new development from the north east area of Aurora.

Aurora HS is a dual track school that serves French Immersion students from King Township, Oak Ridges, northern rural Whitchurch-Stouffville and all of Aurora. Secondary regular track enrolment from the west side of Aurora has been declining for a number of years while the French Immersion enrolment has been climbing steadily. This balance of French Immersion growth and regular track decline has helped maintain total enrolment at the school.

Dr. G.W. Williams SS serves central and northeast Aurora. Central Aurora is comprised of older communities experiencing declining secondary enrolment where as northeast Aurora has a number of new communities experiencing development growth. A Gifted program opened in 2014 serving Gifted students from Aurora and Oak Ridges.

Georgina Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Keswick HS	1,069	1,071	1,011	974	959	952	971	6

Total Utilization		69%	66%	64%	62%	60%	61%		

Area Summary

Georgina has 2 secondary schools; Keswick HS and Sutton DHS. These two schools operate at a combined utilization of 69% which is projected to decline to 61% by 2019.

Sutton DHS was the only secondary school serving Georgina prior to 2000. It had a peak enrolment of 1,797 in 1999 which generated the need for a new high school. Keswick HS opened in 2000. Since that time Sutton DHS has experienced declining enrolment and will continue to decline until more new development is built out post 2019. There will be excess capacity available at Sutton DHS for many years.

Keswick HS has had a stable enrolment for many years and has been declining slowly since 2006. New development growth planned in the south part of the Keswick community will increase enrolment at this school.

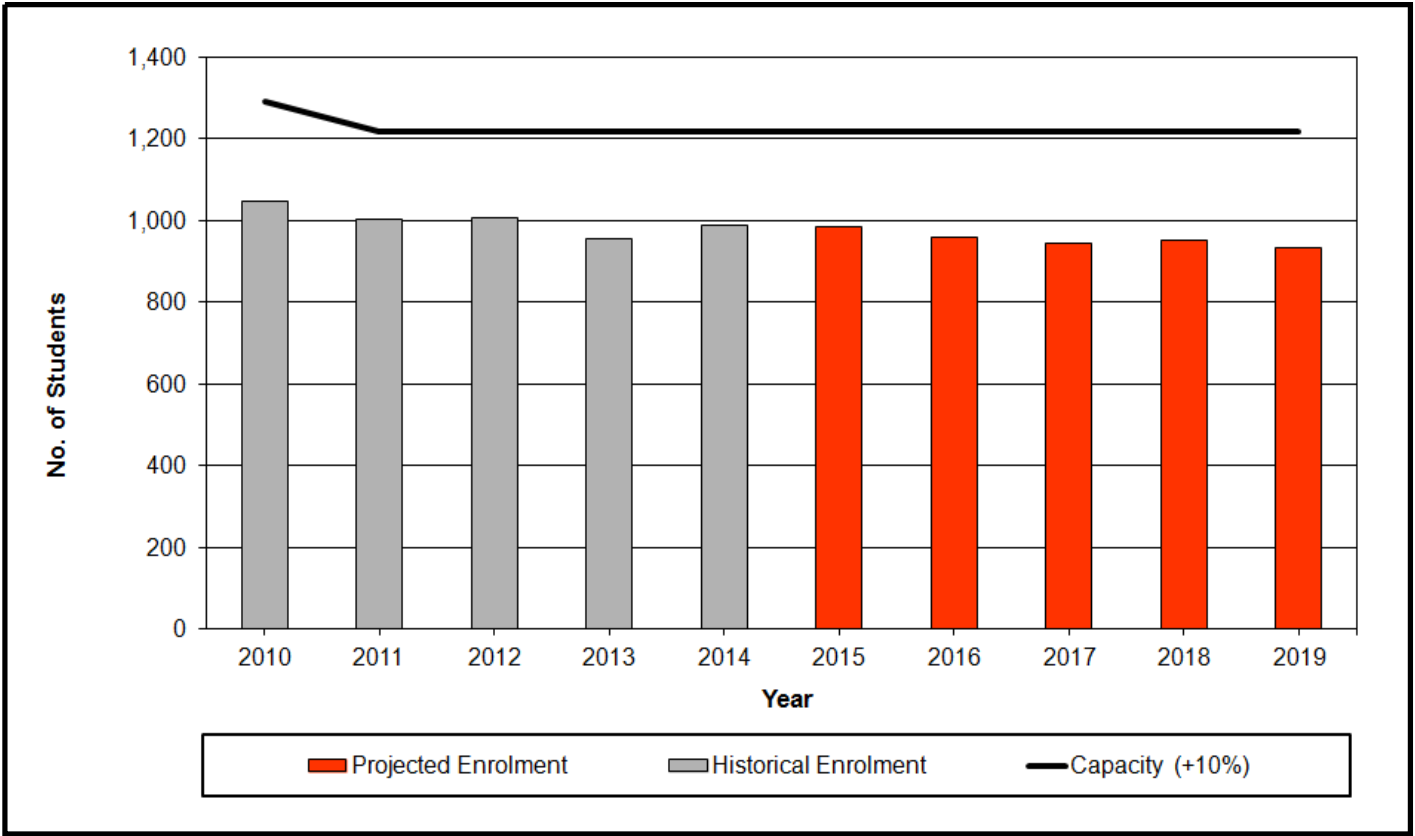

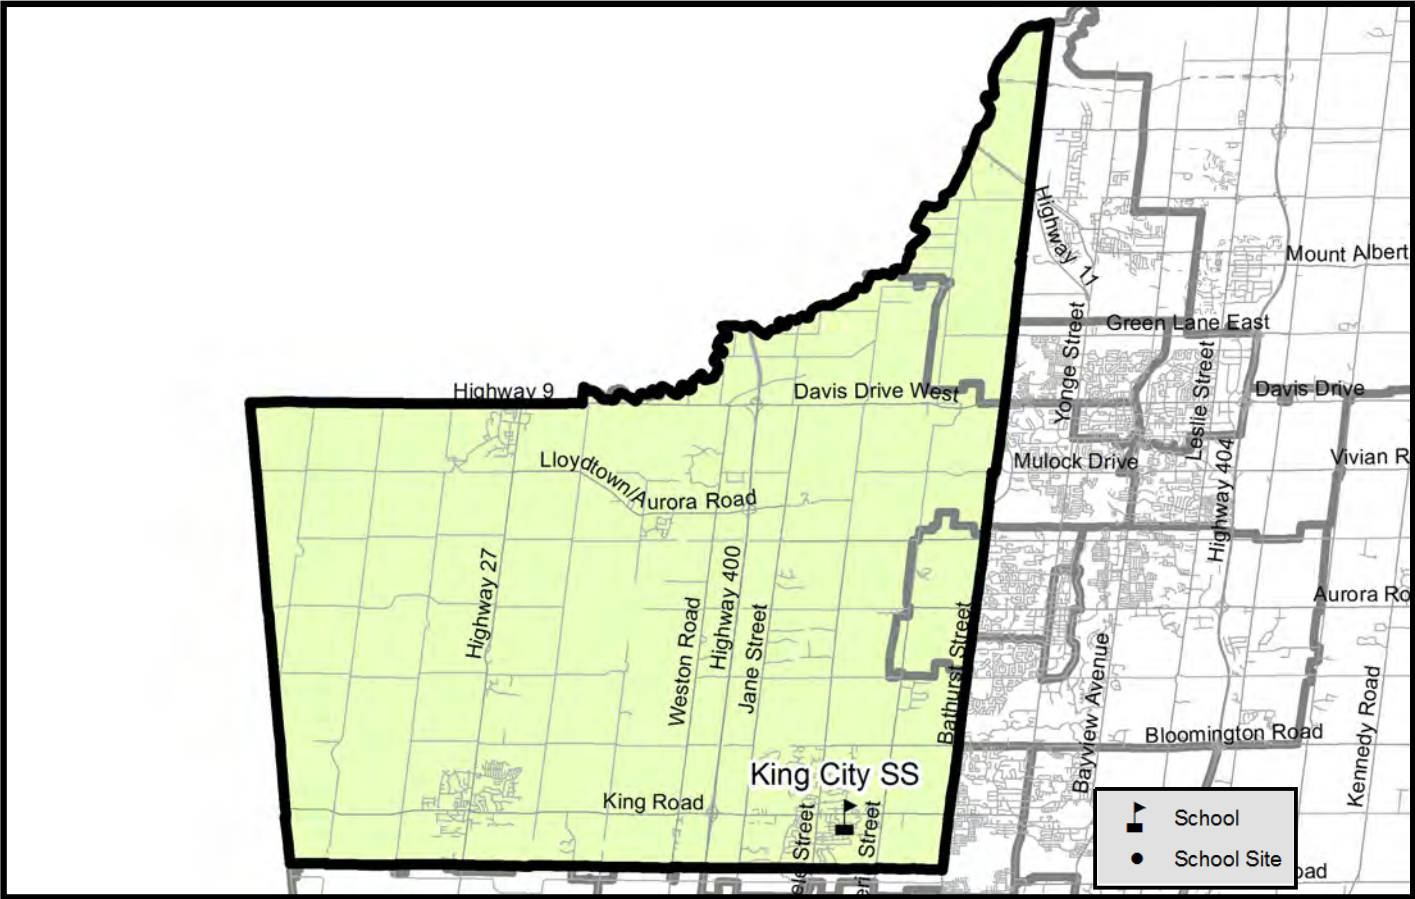

King Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments

Total Utilization		81%	81%	79%	78%	78%	77%		

Area Summary

King City SS serves the Township of King and the western half of Oak Ridges. King City SS had a peak enrolment of approximately 1,550 students in 2001 and has had a maintained a stable enrolment since 2003. There is new development occurring in King City which will assist in keeping enrolment levels stable at the school.

Markham Centre Secondary

Total Utilization		107%	110%	114%	115%	115%	114%		

Area Summary

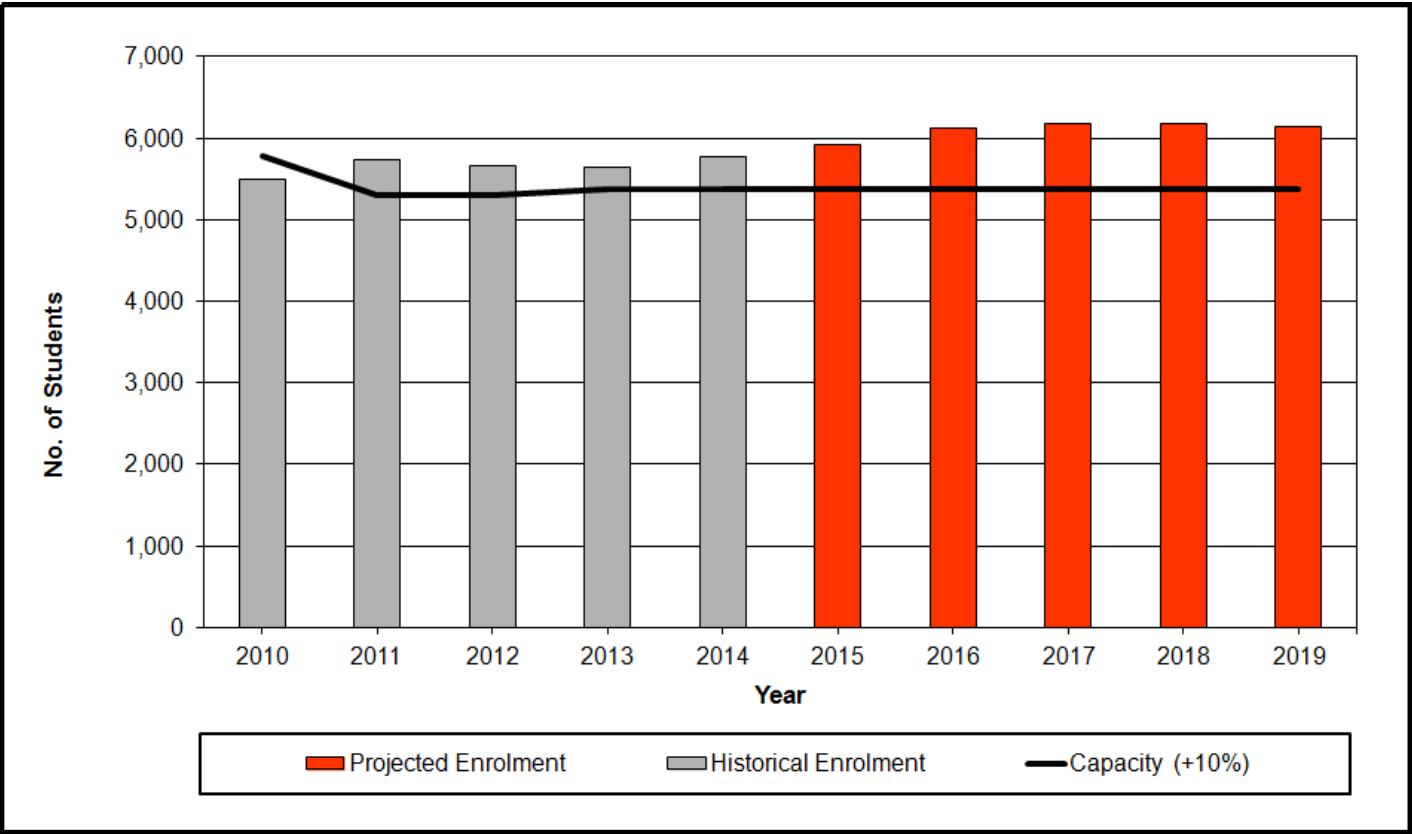

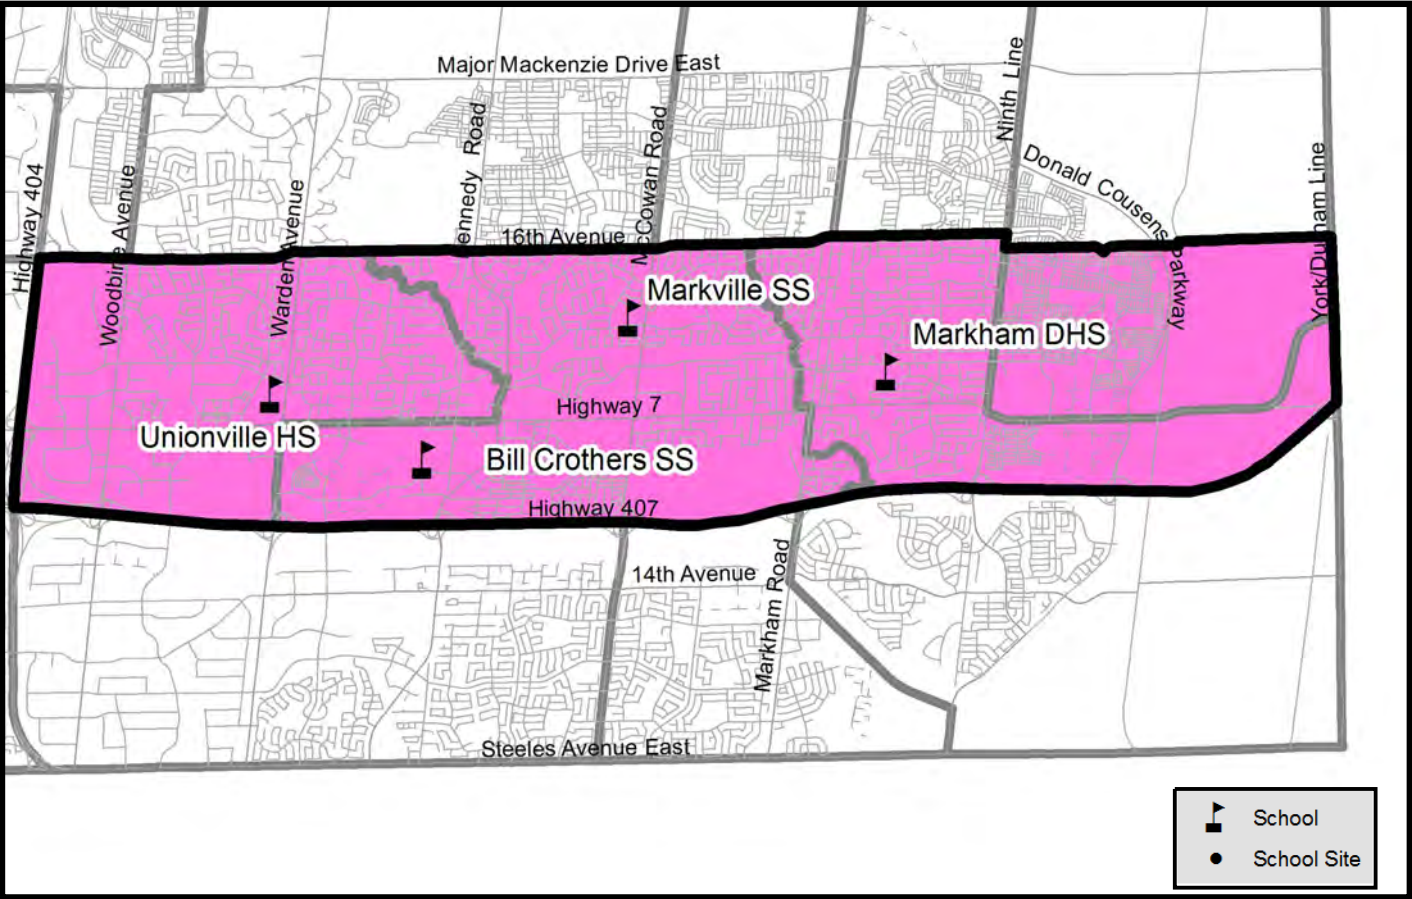

There are 4 secondary schools located in central Markham. The current utilization is 107% increasing to 114% by 2019 due to new residential development.

Bill Crothers SS opened in 2008 and is the most recently built new school in central Markham. Bill Crothers SS has an athletics focused program serving all of York Region where students apply to attend.

Markham DHS is located near historic downtown Markham and was replaced on the same property in 2010. Even though the school serves the oldest community in Markham, enrolment remains stable. The school offers gifted programming serving the eastern part of Markham.

Markville SS enrolment has maintained a stable enrolment over the last 10 years. A gifted program began at the school in 2011.

Unionville HS has an Arts program that serves the eastern portion of the region. The school's enrolment has been slowly declining since 2010 as existing communities in its attendance boundary continue to mature; over the next 5 years its enrolment is expected to remain stable.

Total Utilization		128%	132%	138%	89%	93%	97%		

Area Summary

There are 2 existing and one new secondary school under construction serving the Markham North community.

Bur Oak SS was built in 2007; enrolment has been growing steadily since opening. Bur Oak SS is holding students for the new secondary school planned for the Cornell community.

Pierre Elliott Trudeau HS was built in 2002 and an addition was completed in 2014. It currently offers the only French Immersion program serving Markham and most of Whitchurch-Stouffville. As a result of new residential development and strong French Immersion participation rates, a new secondary school will be built in the Cornell community. This school will open in 2017 and will include a French Immersion program to serve the eastern part of Markham and Whitchurch-Stouffville.

Markham South Secondary

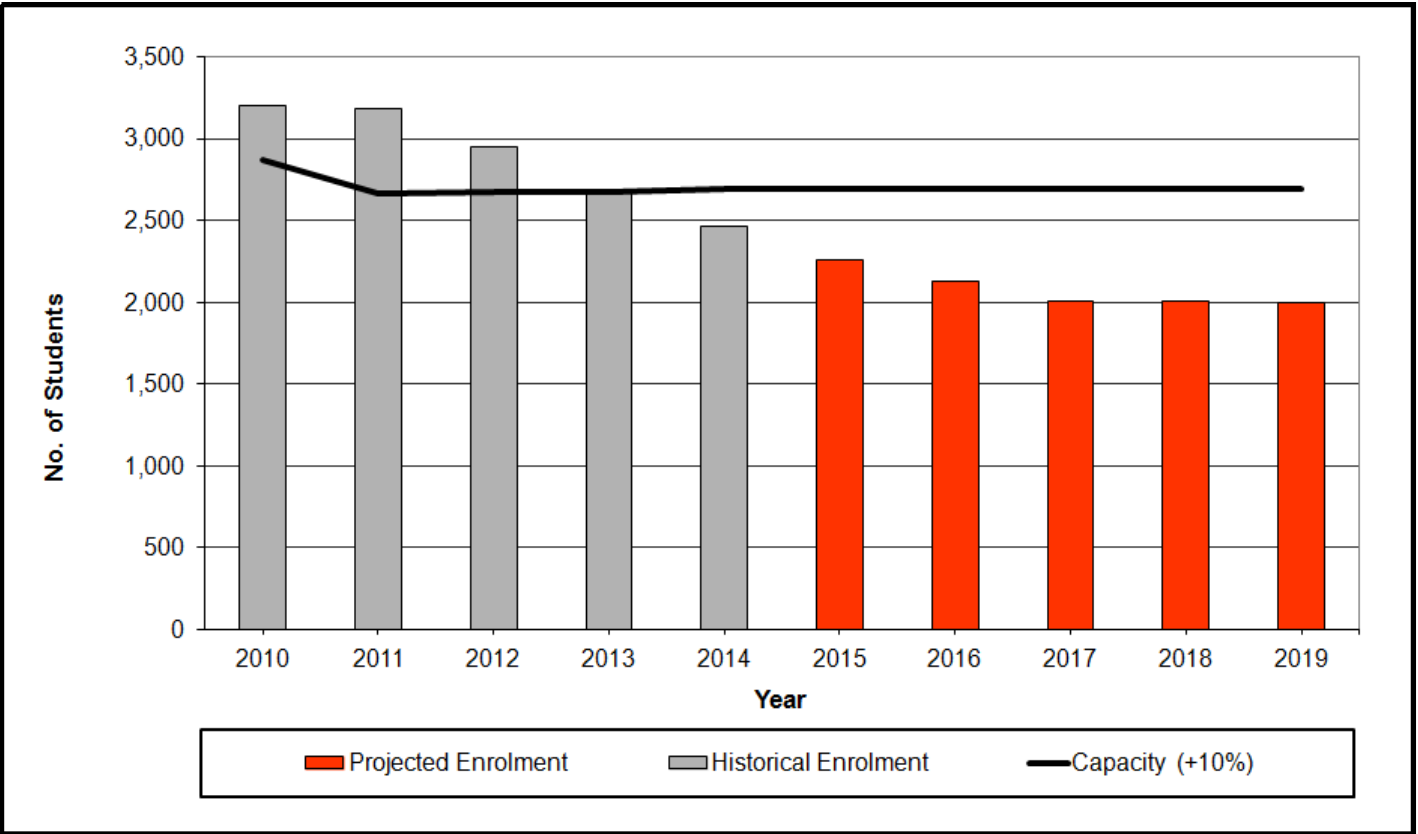

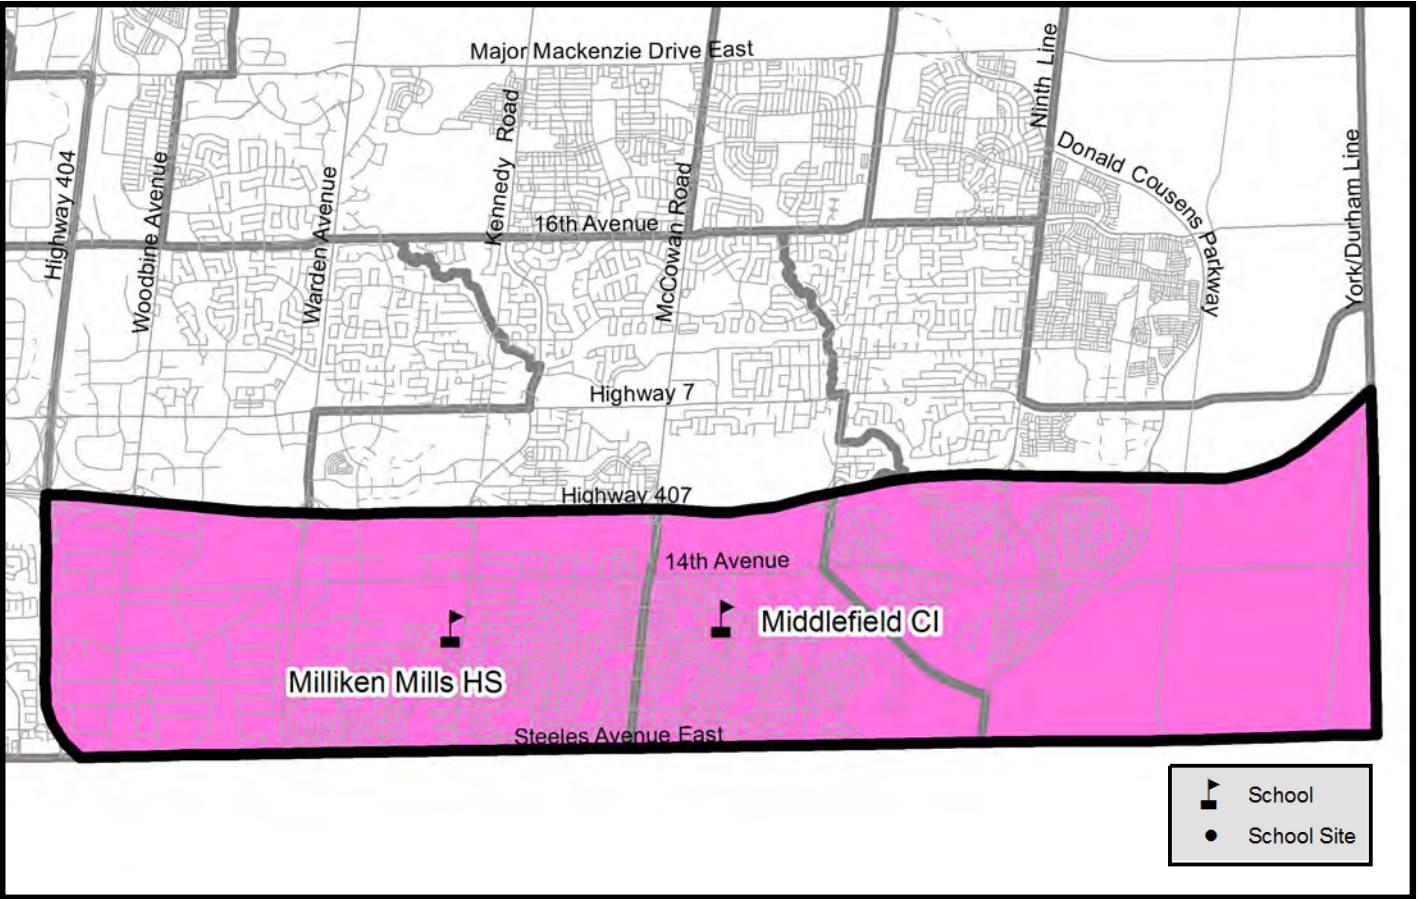

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Middlefield CI	1,426	1,399	1,291	1,225	1,164	1,186	1,208	4	
Milliken Mills HS	1,264	1,061	964	902	845	818	786	3	
	2,690								
Total Enrolment		2,460	2,255	2,127	2,009	2,004	1,994		
Total Utilization		91%	84%	79%	75%	75%	74%		

Area Summary

Markham South is served by 2 secondary schools: Middlefield CI and Milliken Mills HS. Current utilization is projected to decline from 91% to 74% in 2019.

Enrolment at these two schools has started to decline in the last few years as the communities in the area mature. The grade 9 intake at these schools peaked in 2008 and 2009 and has decreased as the elementary feeders have decreased in enrolment. Portables were utilized to help accommodate students at the peak and will no longer be required.

Markham Thornhill Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Thornhill SS	1,139	1,111	1,087	1,055	1,023	972	903	6	Gifted
Thornlea SS	1,445	735	704	742	756	755	762	0	French Immersion
	2,584								
Total Enrolment		1,846	1,791	1,797	1,779	1,726	1,666		
Total Utilization		71%	69%	70%	69%	67%	64%		

Area Summary

Markham Thornhill is served by 2 secondary schools: Thornhill SS and Thornlea SS. Current utilization of 71% is projected to decline to 64% by 2019.

Thornhill SS has had a fairly stable enrolment; the school projection indicates a slight decline over the next five years. Thornhill SS has a gifted program.

The enrolment at Thornlea SS was approximately 2,000 students between 1985 and 2000. However, as communities served by this school matured, enrolment at the school began to decline. In 2012, a French Immersion program was opened.

Newmarket / East Gwillimbury Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014

Total Utilization		94%	93%	93%	94%	95%	99%		

Area Summary

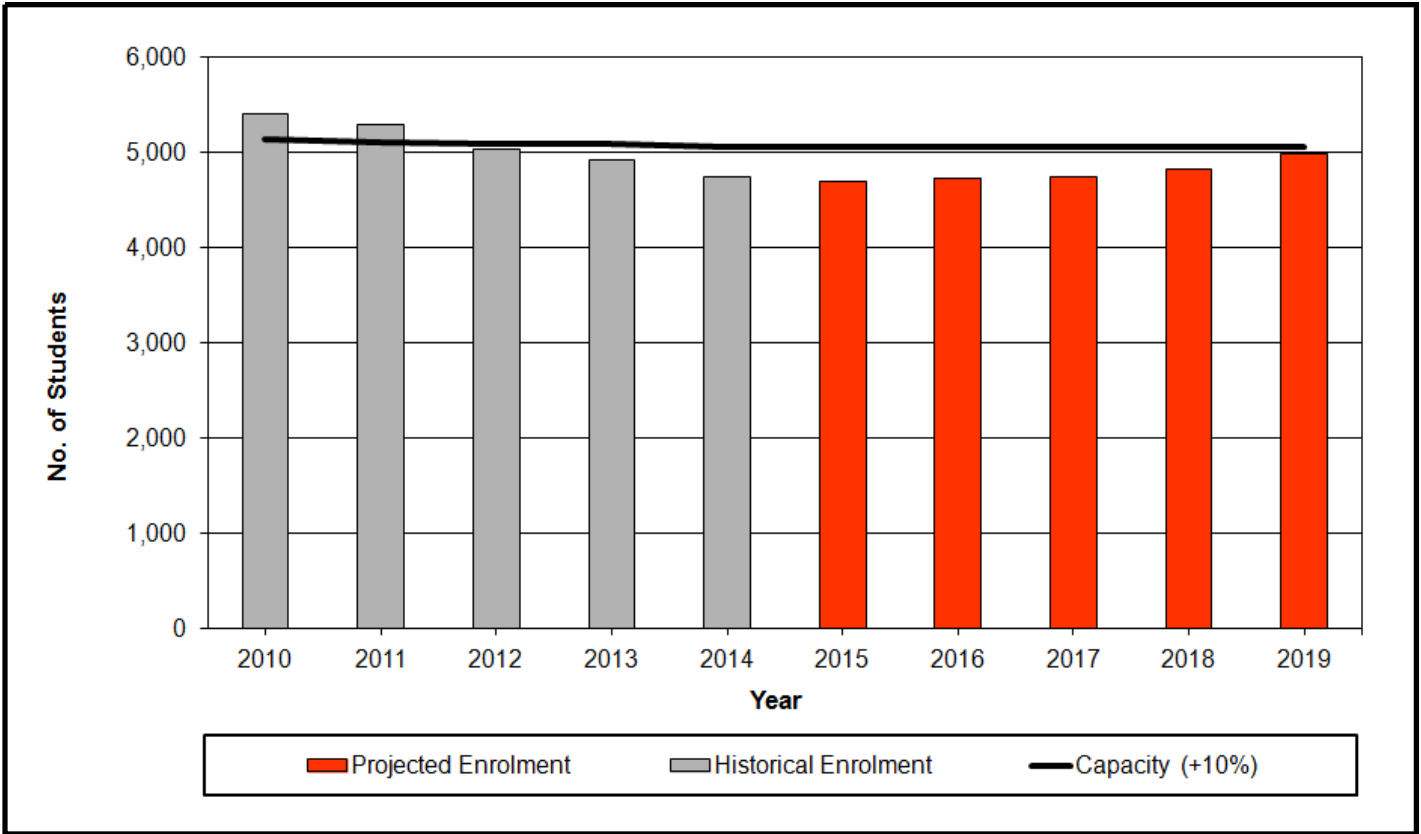

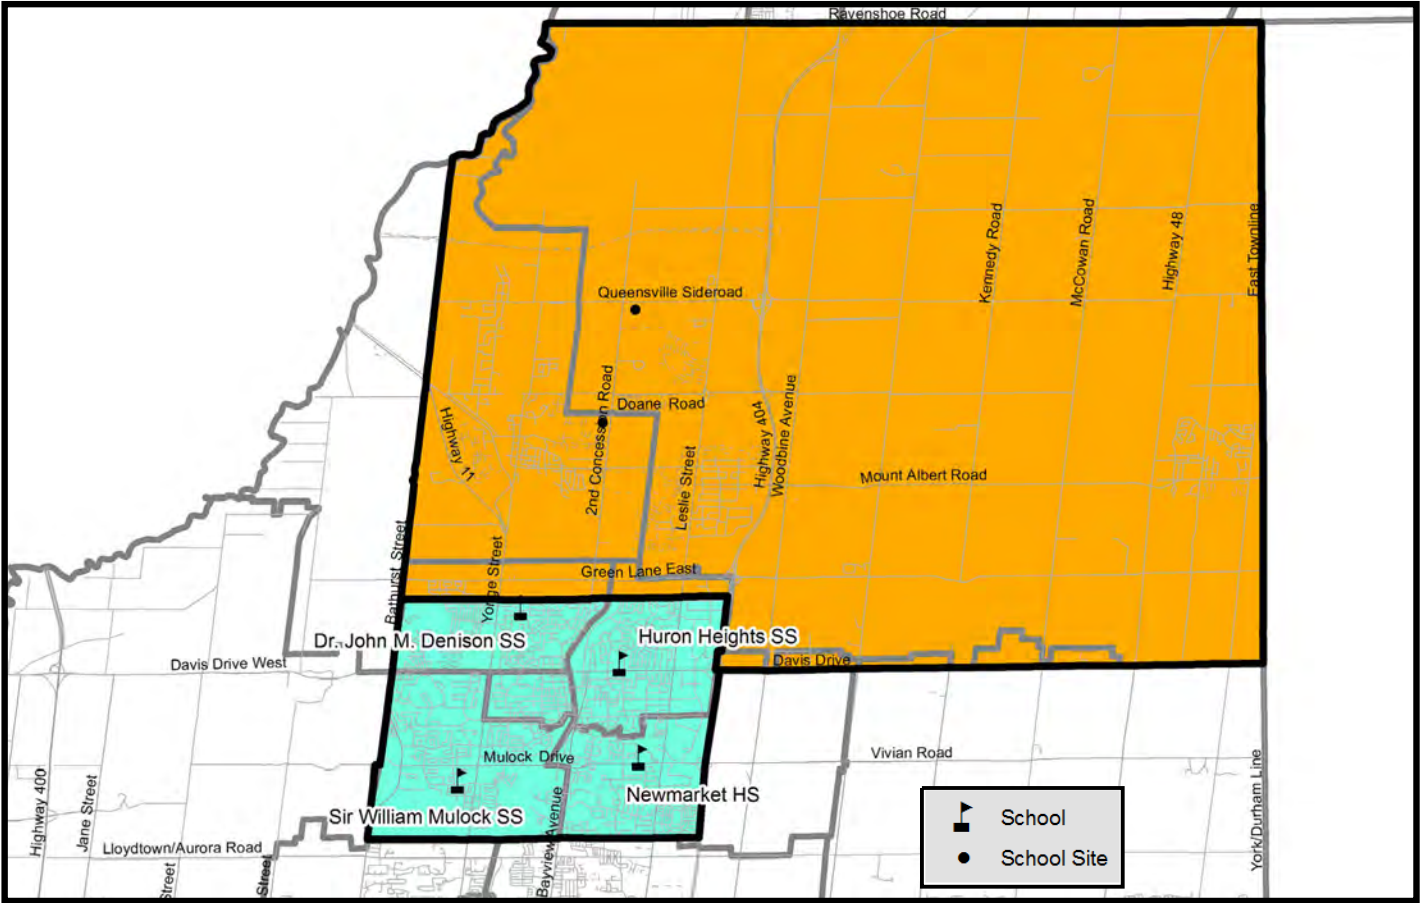

There are 4 secondary schools in Newmarket serving Newmarket and East Gwillimbury. Overall utilization is projected to increase slightly to 99% by 2019.

Dr. John M. Denison SS is located in northwest Newmarket. This school serves Newmarket and Holland Landing. Enrolment is projected to grow as new development is built in the Holland Landing area.

Huron Heights SS is located in northeast Newmarket. This school also serves Newmarket and most of East Gwillimbury including Sharon, Queensville and Mount Albert. Huron Heights SS offers an Arts program. Enrolment is projected to decline slightly before new development begins in Sharon and Queensville.

Newmarket HS serves southeast Newmarket and also the historic downtown core of Newmarket. Newmarket HS offers a French Immersion and Gifted program. Enrolment is projected to continue to grow as students from new development in southeast Newmarket enter the secondary panel and French Immersion students from the elementary panel enter secondary school.

Sir William Mulock SS is located in southwest Newmarket and was the most recent school built in Newmarket. Enrolment is projected to remain stable and the school will continue to operate at capacity for the next 5 years.

Richmond Hill / Oak Ridges Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Alexander Mackenzie HS	1,310	928	860	842	836	854	877	0	Arts

Total Enrolment		6,827	6,838	7,077	7,063	7,131	7,152		
Total Utilization		113%	113%	117%	117%	118%	118%		

Area Summary

There are 5 secondary schools serving Richmond Hill and Oak Ridges. Some of these schools also serve parts of Markham and Vaughan. Current utilization is 113% increasing to 118% by 2019 due to new residential development. Though the planning area can accommodate students; both Bayview SS and Richmond Hill HS are experiencing high utilization and may require a rebalancing of programs.

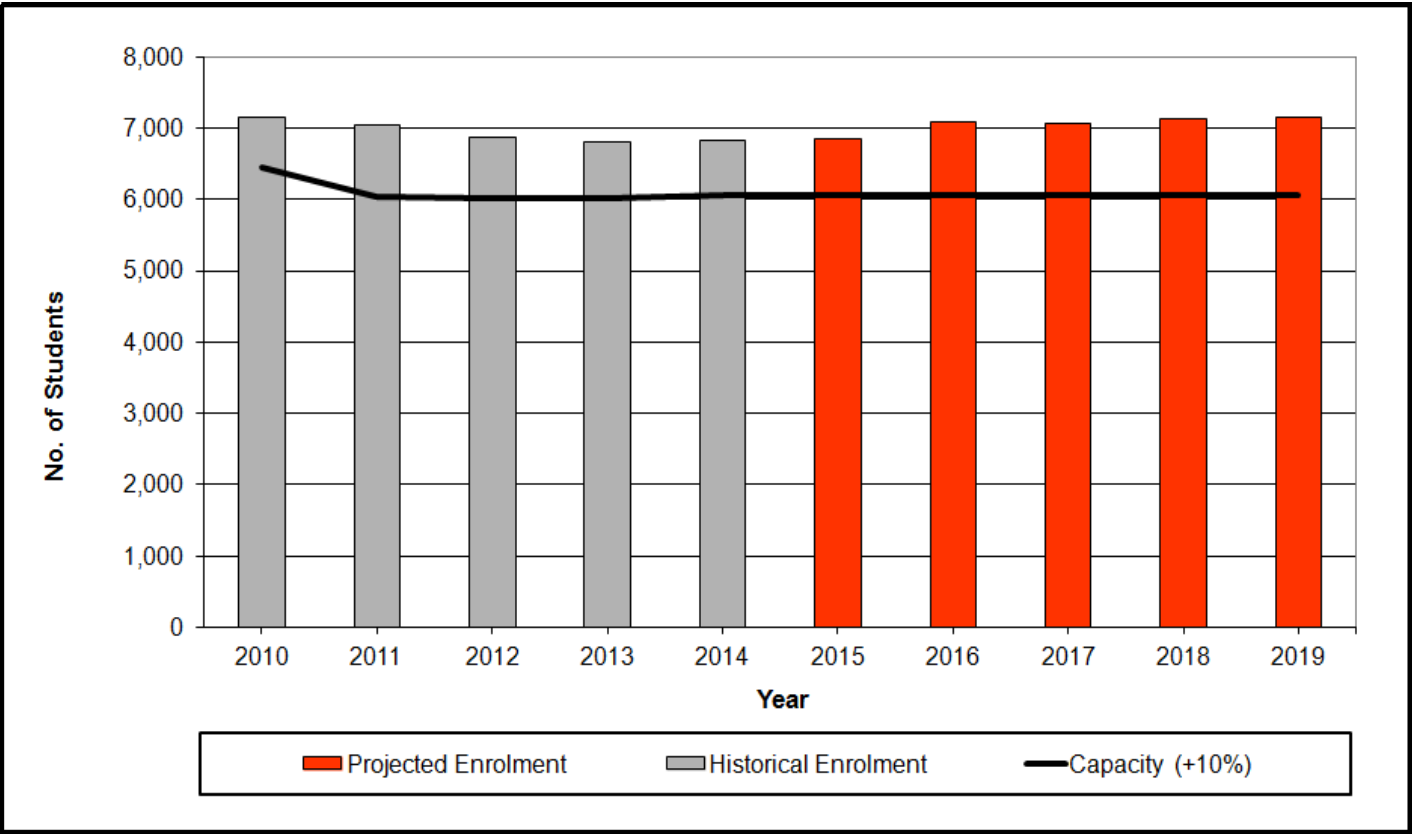

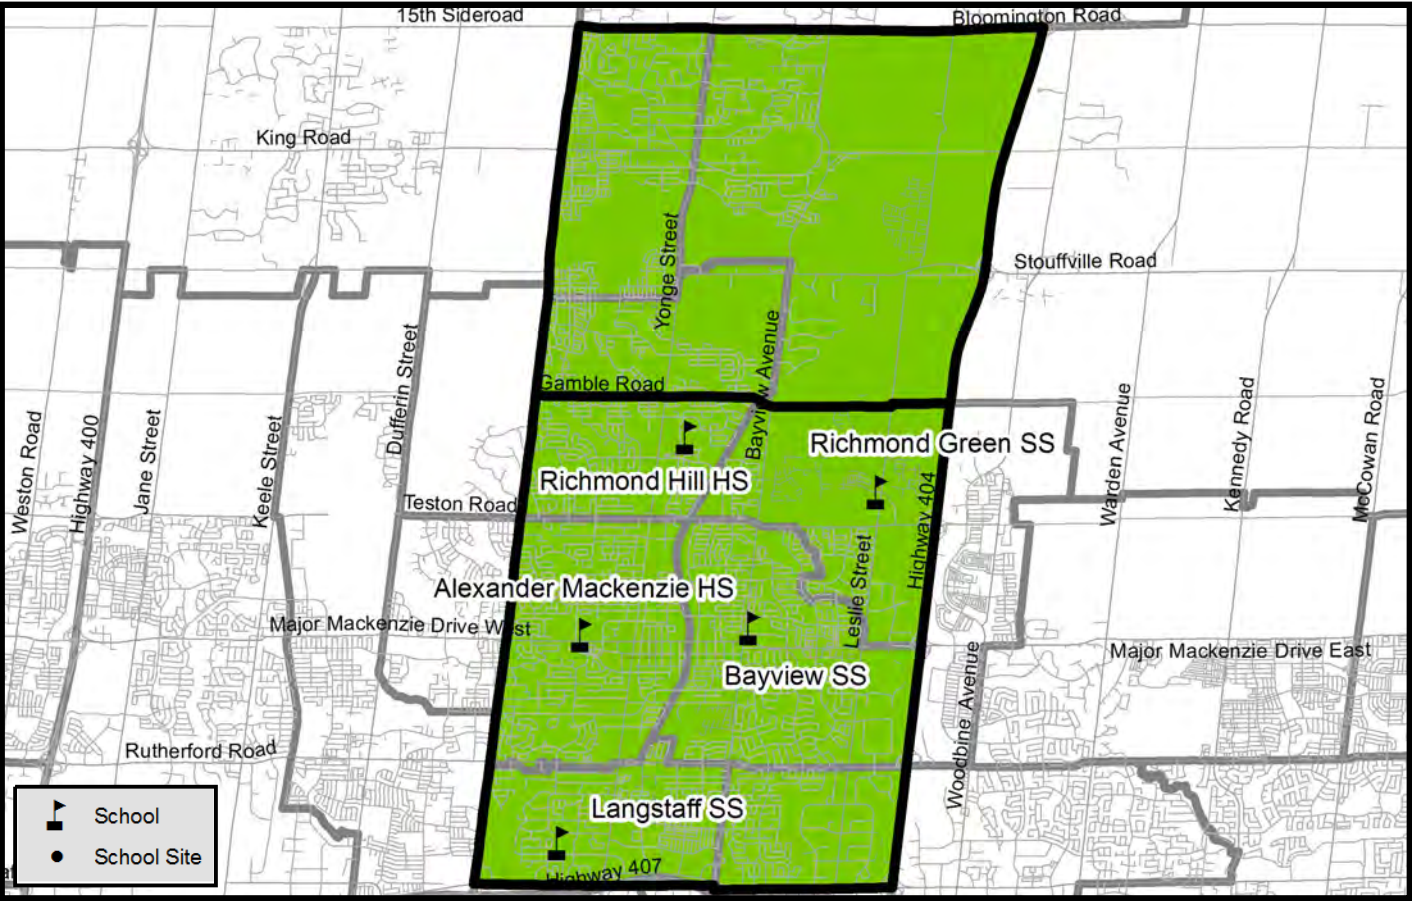

Alexander Mackenzie HS serves a portion of Vaughan and a small western portion of Richmond Hill. Alexander Mackenzie HS has an Arts program that began in 2009. Enrolment has been slowly declining since 2010 as the Richmond Hill community continues to mature.

Bayview SS serves a portion of eastern Richmond Hill and also has the only International Baccalaureate (IB) program in the Board. Future enrolment is projected to remain high at Bayview SS.

Langstaff SS is a dual track French Immersion school serving FI students from the west side of Richmond Hill. The school is projected to maintain a stable enrolment in the future.

Richmond Green SS serves a portion of west Markham, east Oak Ridges and east Richmond Hill. The school opened in 2005 and has maintained a stable enrolment over the last 5 years. Enrolment is projected to increase with new development in the area.

Richmond Hill HS offers a gifted program. The school was replaced in 2000 and enrolment is projected to remain high.

Vaughan Maple Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Maple HS	1,274	1,207	1,178	1,148	1,134	1,086	1,073	4	Gifted
Stephen Lewis SS	1,376	1,320	1,390	1,442	1,541	1,669	1,746	0	
	2,650								
Total Enrolment		2,526	2,568	2,591	2,675	2,755	2,818		
Total Utilization		95%	97%	98%	101%	104%	106%		

Area Summary

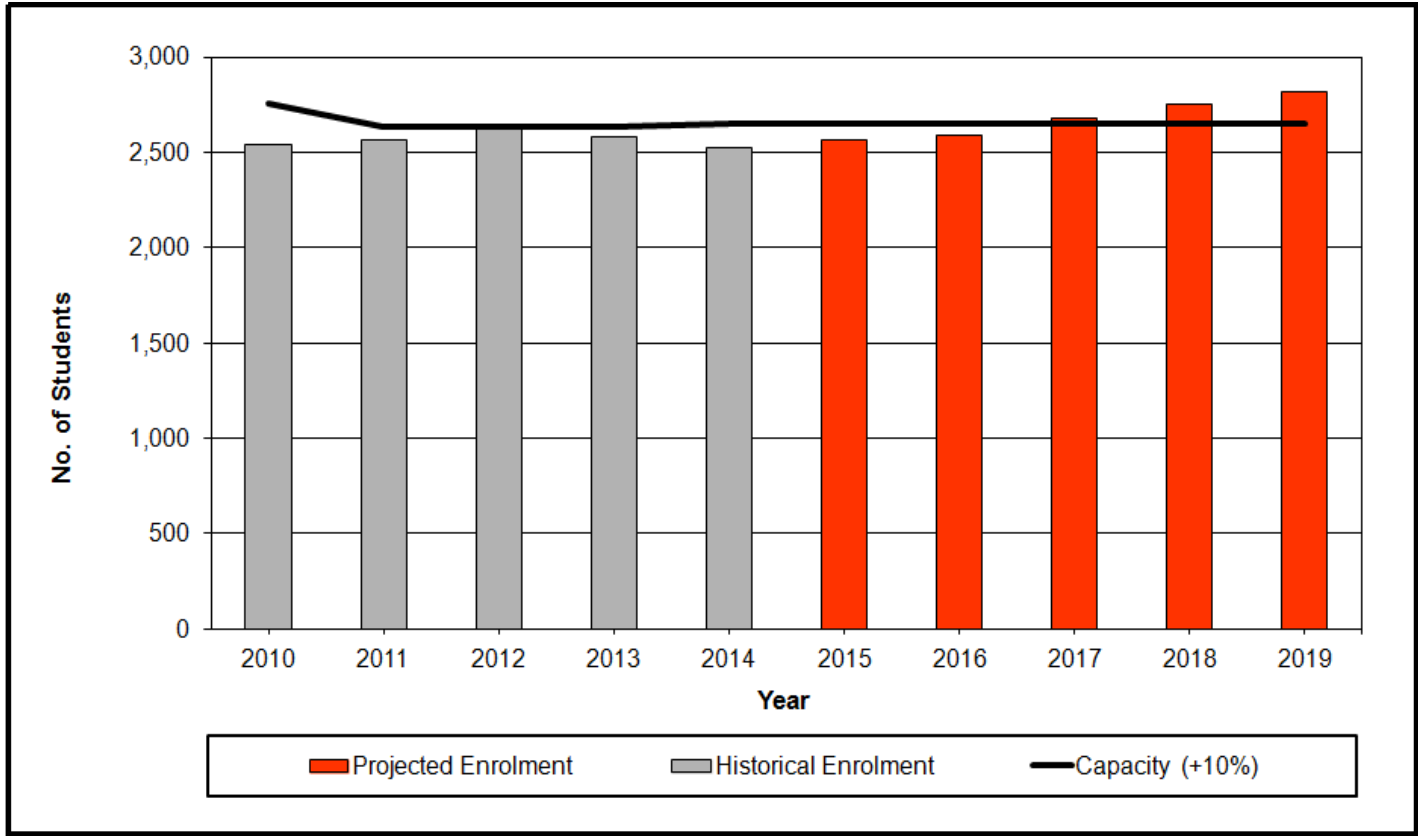

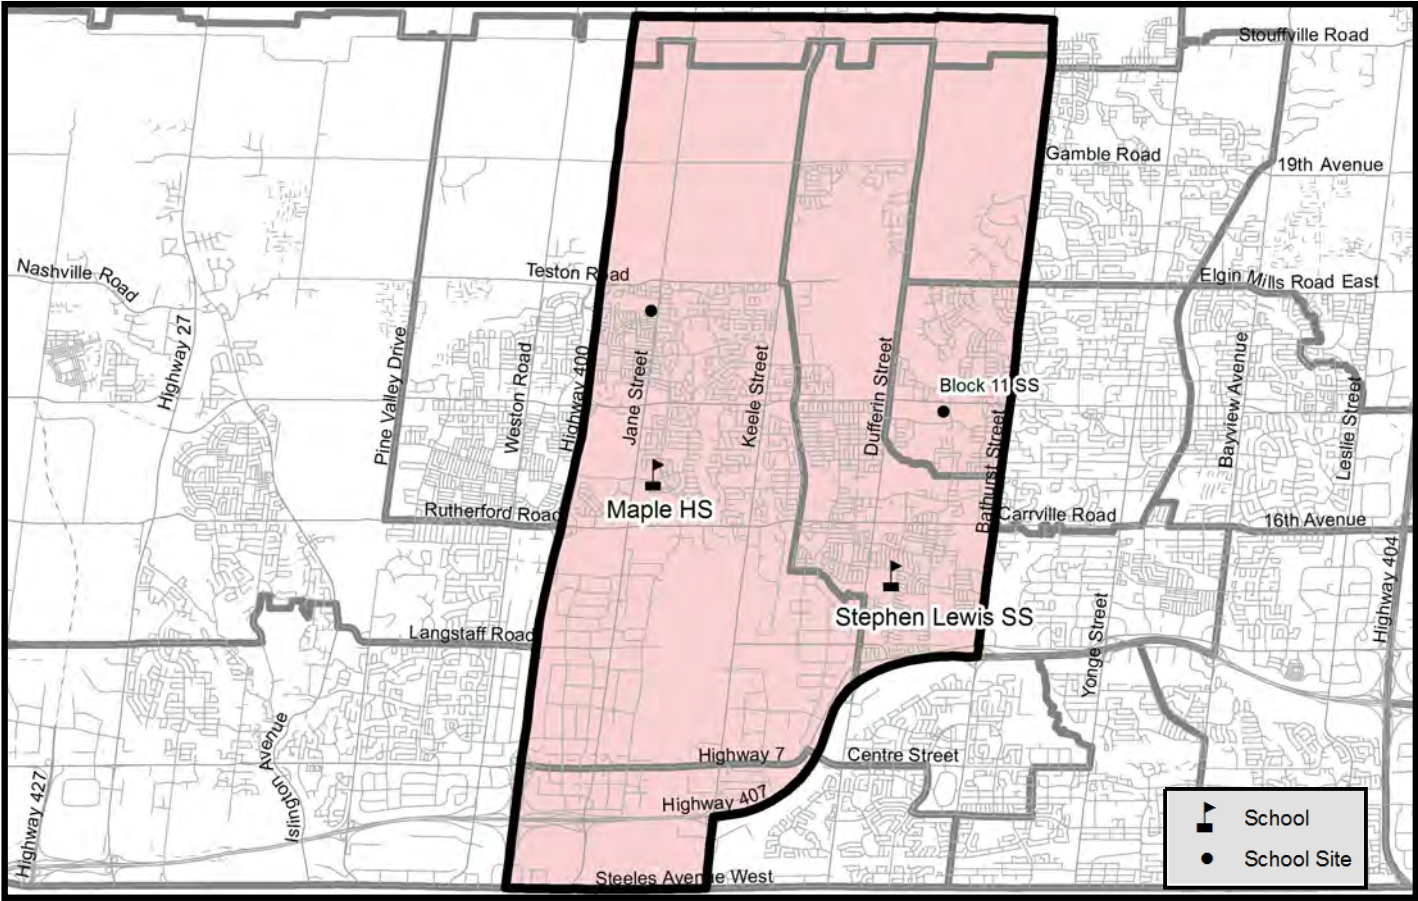

This planning area is served by Maple HS and Stephen Lewis SS. Total utilization is projected to increase to 106% by 2019 due to new residential development.

Enrolment at Maple HS has remained stable over the past decade. Enrolment will decline slowly over the next few years as low density communities mature. Maple HS Gifted program started in 2014 and serves students living north of Rutherford Road in the City of Vaughan.

Stephen Lewis SS opened in 2006; enrolment has continually grown over the last 5 years due to new residential development. Enrolment is projected to grow significantly as large cohorts of elementary school students enter the secondary panel. This significant growth supports the need for a new secondary school in the Block 11 and 12 communities.

Recommendations:

A new secondary school will be required to serve new growth in the Dufferin Street & Bathurst Street corridor.

Vaughan Thornhill Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Vaughan SS	1,089	1,163	1,179	1,118	1,151	1,220	1,275	0	French Immersion
Westmount CI	1,096	1,157	1,144	1,158	1,145	1,123	1,085	0	Arts
	2,185								
Total Enrolment		2,320	2,323	2,276	2,296	2,343	2,361		
Total Utilization		106%	106%	104%	105%	107%	108%		

Area Summary

There are 2 secondary schools serving the west side of Thornhill; Vaughan SS and Westmount CI. Total utilization is expected to remain relatively constant at 108% by 2019.

Vaughan SS enrolment has experienced continuous growth since a French Immersion program was introduced in 2009. The French Immersion program will grow significantly as the larger cohorts of French Immersion students from the elementary panel enter secondary school. Starting in 2015, a French Immersion program will begin at Woodbridge College to serve students living west of Jane Street. Continued growth at Vaughan SS will require the addition of another French Immersion secondary site in the Bathurst Street and Dufferin Street area. The growth in French Immersion supports the need for a new secondary school in the Block 11 and 12 communities.

Westmount CI has maintained a stable enrolment over the past decade. An Arts program was introduced in 2009.

Vaughan Woodbridge Secondary

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Emily Carr SS	1,241	1,458	1,411	1,415	1,478	1,533	1,581	0	
Tommy Douglas SS	1,492	385	680	957	1,137	1,228	1,301	0	Opened 2014
Woodbridge College	851	726	665	607	618	659	659	13	
	3,584								
Total Enrolment		2,570	2,756	2,978	3,233	3,420	3,541		
Total Utilization		72%	77%	83%	90%	95%	99%		

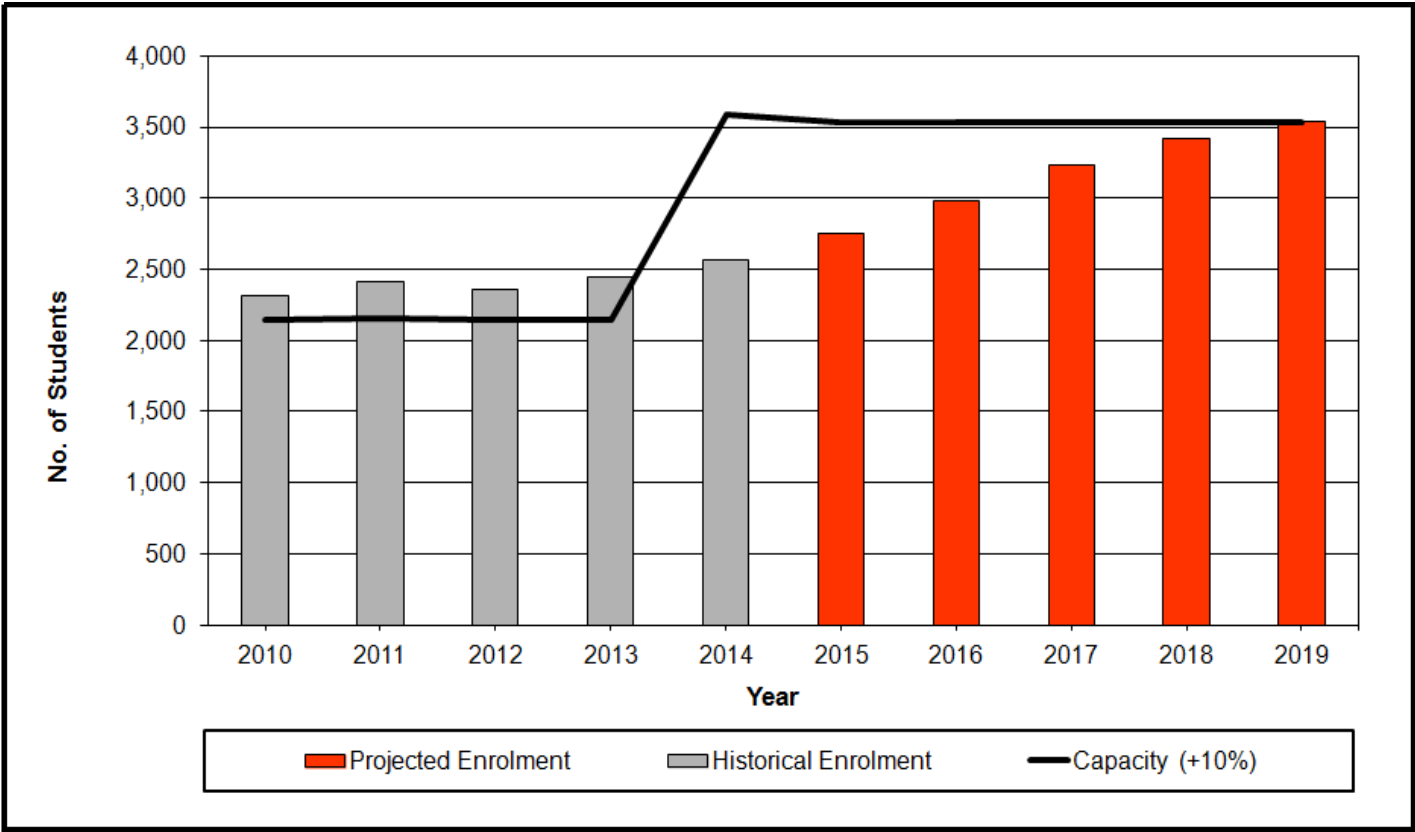

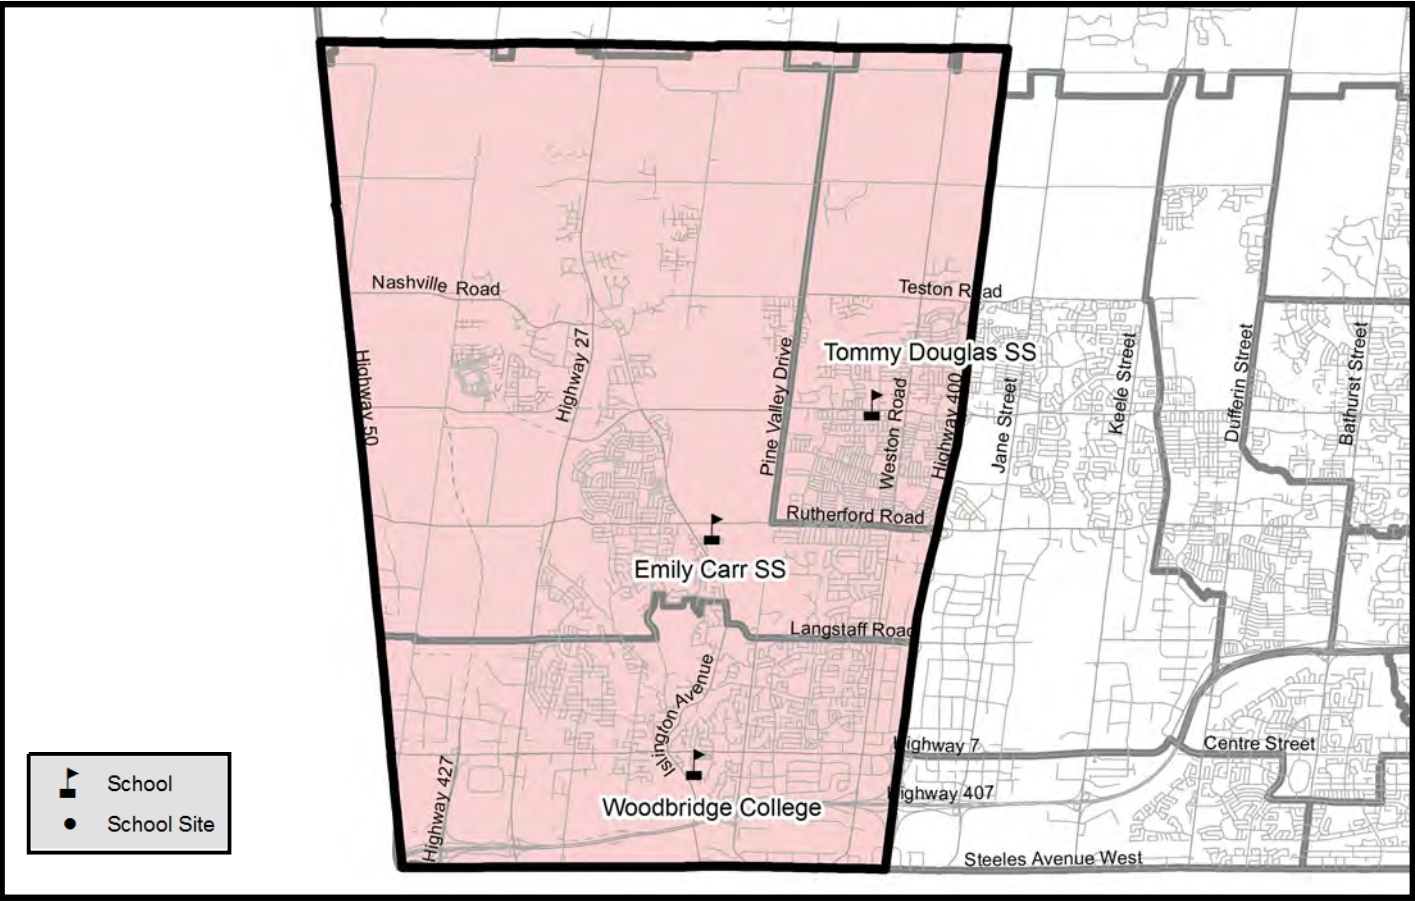

Area Summary

There are 3 secondary schools serving the Vaughan Woodbridge area; Woodbridge College, Emily Carr SS and Tommy Douglas SS. The current utilization of 72% is projected to increase to 99% by 2019 due to new residential development.

Woodbridge College first opened in 1957 and was the only school serving the area until Emily Carr SS opened in 2003. Woodbridge College has been holding students from the Tommy Douglas SS boundary; as the large pool of grade 11 and grade 12 student's graduate from Woodbridge College, the enrolment will decline. To help with enrolment decline and also enrolment pressures at Vaughan SS, a French Immersion program will begin at Woodbridge College in September 2015 to serve students living west of Jane Street.

Emily Carr SS serves the northwest area of the City of Vaughan; enrolment will grow from new residential units projected in the Village of Kleinburg. Students from Tommy Douglas SS were also held at Emily Carr SS; as the pool of grade 11 and grade 12 student's graduate from Emily Carr SS, growth in enrolment will be moderate.

Tommy Douglas SS opened in 2014 with grades 9 to 10. Enrolment is projected to grow as the school will add an additional grade each year until a full program is reached; as well, there is significant new development.

Whitchurch-Stouffville Secondary

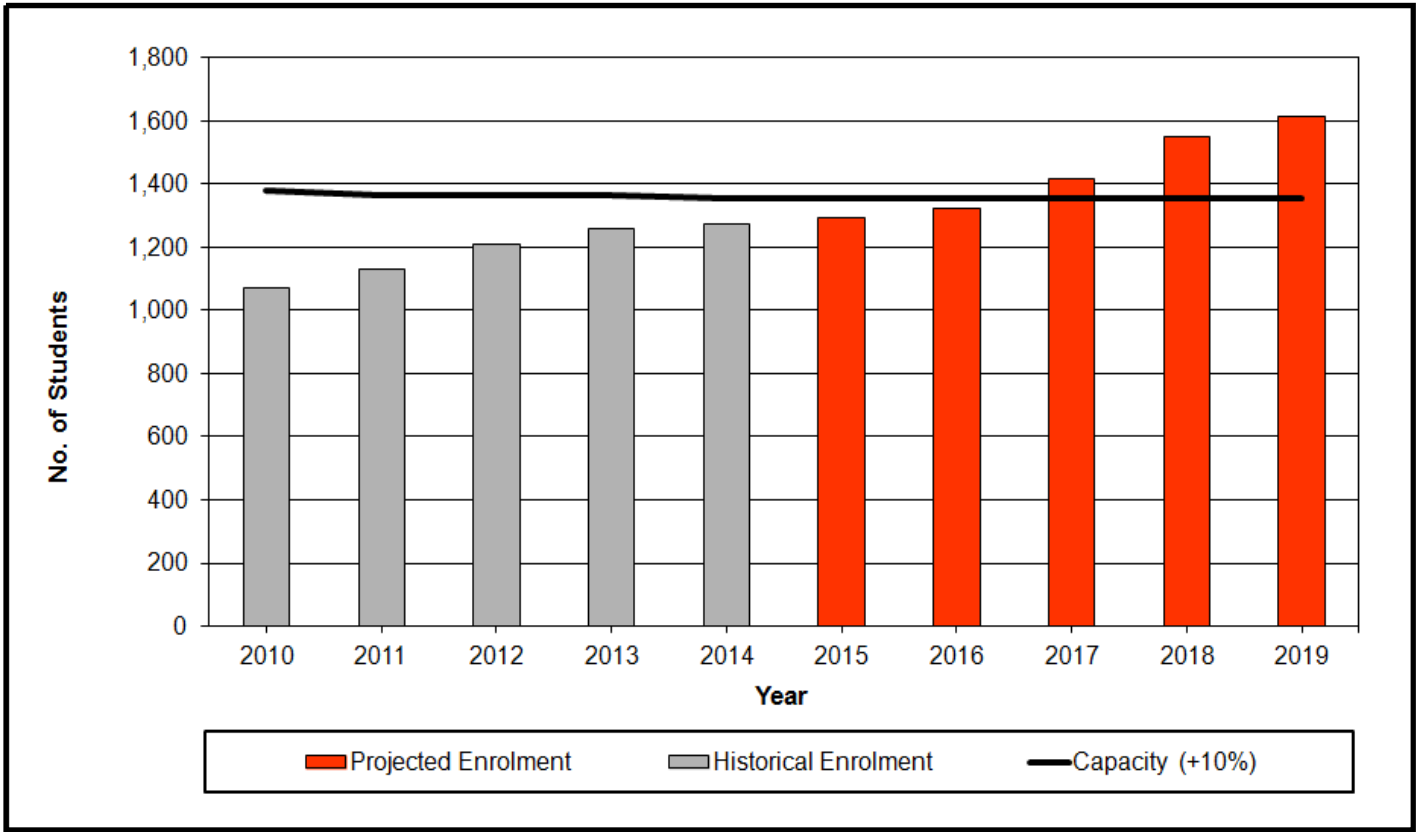

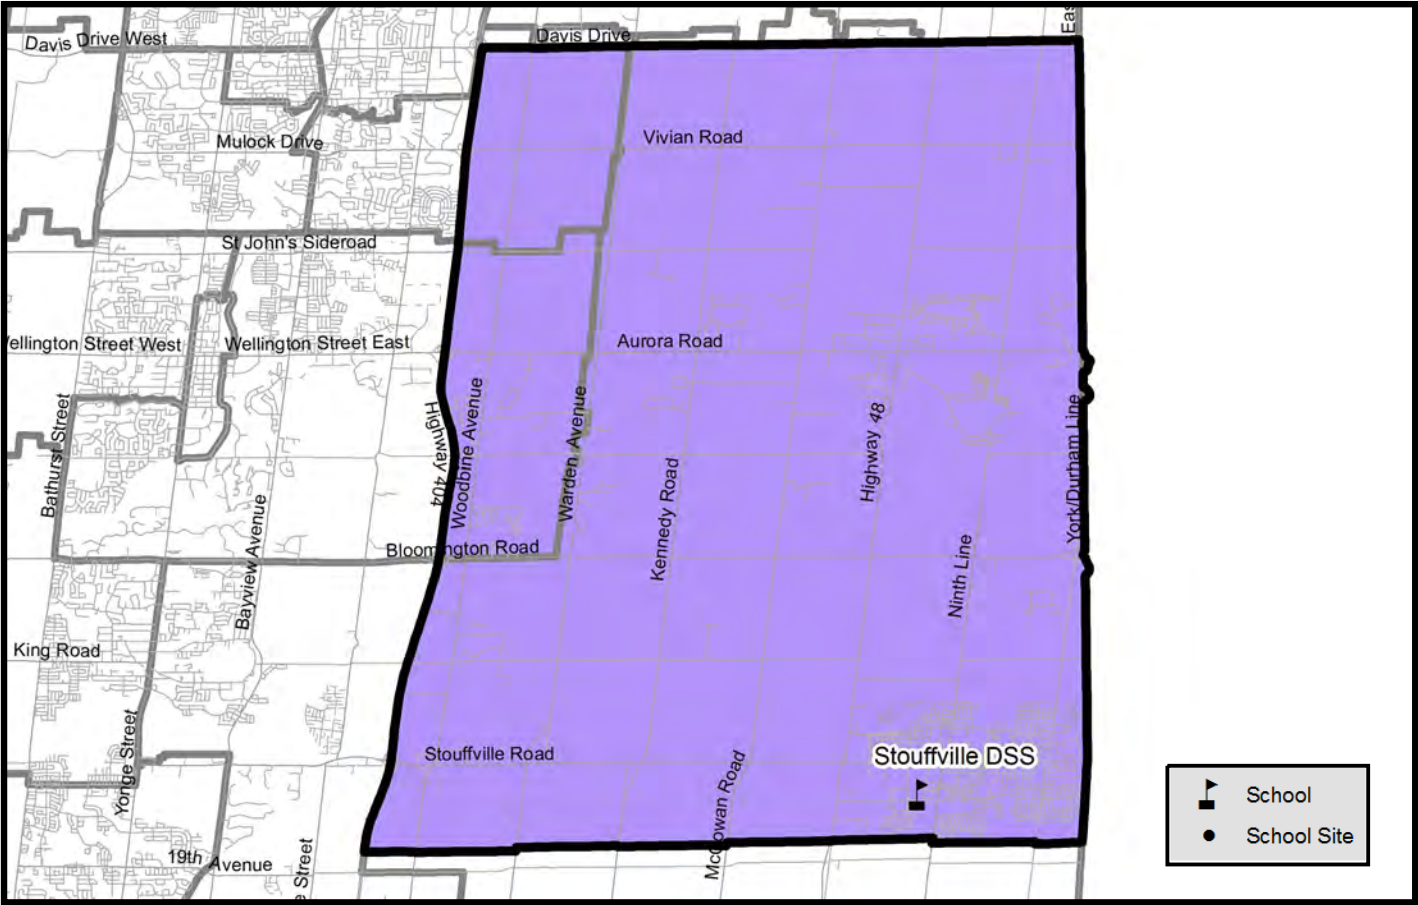

School Enrolment

	Capacity	Current Enrolment	Projected Enrolment					Portables	Comments
		2014	2015	2016	2017	2018	2019	2014	
Stouffville DSS	1,353	1,272	1,291	1,323	1,415	1,548	1,616	0	
	1,353								
Total Enrolment		1,272	1,291	1,323	1,415	1,548	1,616		
Total Utilization		94%	95%	98%	105%	114%	119%		

Area Summary

Whitchurch-Stouffville is served by Stouffville DSS. The original school opened in 1953 and was replaced on a new site in 2007. Enrolment has been increasing due to growing population from new residential development over the past 10 years. As new phases of residential development are approved, enrolment will continue to grow.

Recommendations:
A future addition may be required to accommodate students. If new pupil places are required, size and timing will be determined once a threshold of students has been reached. In the short term, portables will be required to accommodate students.

Provincial Education Capital Funding

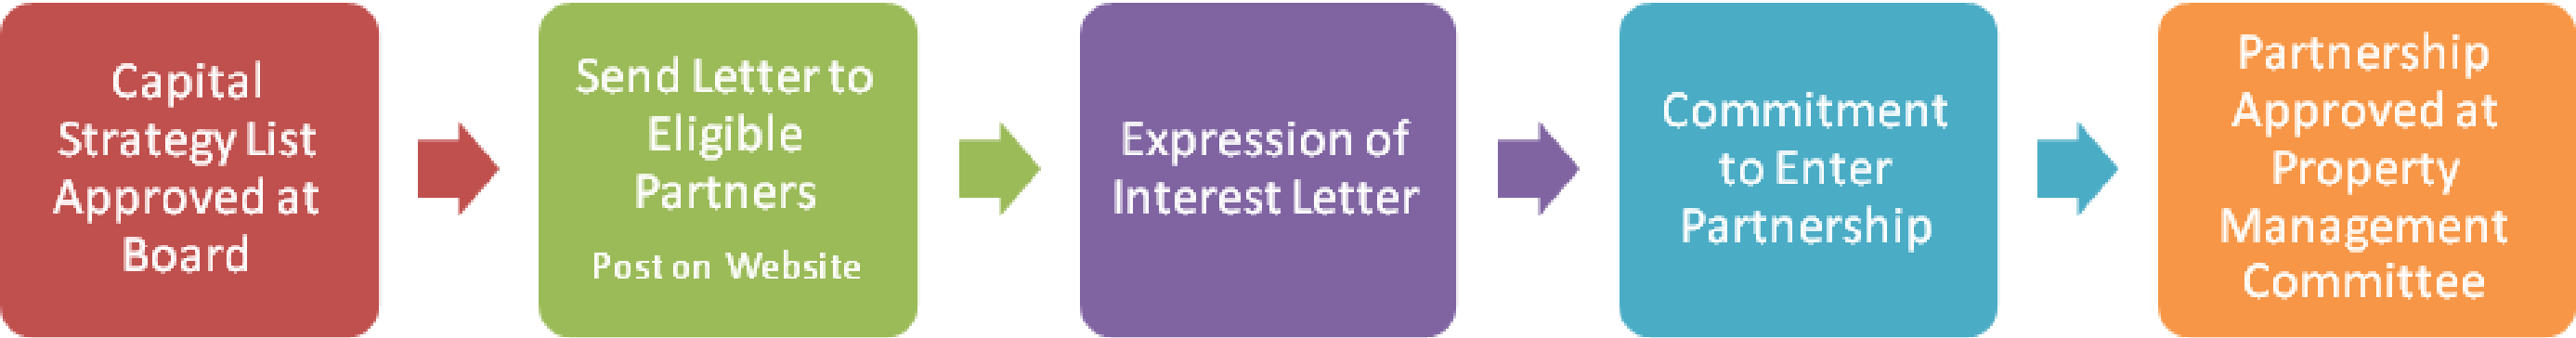

Capital Priorities Grant	School Consolidation Capital	School Condition Improvement Funding
<ul style="list-style-type: none">• Annual funding for new schools, additions, and major renovations to address enrolment pressures, replacement schools, and schools in poor condition• Spring submissions• Autumn funding announcements	<ul style="list-style-type: none">• Approvals for new schools, additions, and major renovations to address consolidation projects• \$750M available provincially over the next 4 years will support right-sizing of school building capacity footprints (e.g. two schools into one)• Projects evaluated for alignment with provincial School Board Efficiencies and Modernization (SBEM) initiative• Autumn submissions• Winter funding announcements	<ul style="list-style-type: none">• Annual funding through Grants for Student Needs (GSN) to target renewal needs in schools• Ministry of Education to review condition of each school over 5 year period (now in year 4)• \$500M available provincially to be allocated in each of 2015-16 and 2016-17• Funding allocated as part of GSN

Appendix 2 - Facility Partnerships

The York Region District School Board has a policy that complies with the Ministry of Education’s partnership guideline that school boards identify opportunities either in existing schools with available space or future school buildings to partner with eligible parties for improved service delivery for communities. The partnership policy provides a process for notifying eligible partners of co-building at new schools and lease opportunities at existing schools. Opportunities for partnerships must adhere to criteria set out in [Policy #422.0, Encouraging Facility Partnerships](#) such as protecting the health and safety of students and being appropriate for a school setting.

New Schools

Once the Capital Strategy List is approved by Trustees, staff will notify eligible partners of future co-building opportunities where a partnership may be considered. Any partnership will be subject to meeting the conditions provided in the Board’s policy as well as ministry funding for the project. The process for eligible partners to indicate their interest and provide commitment to the Board is shown below:

Efforts are made to have new co-build opportunities available to eligible partners at a date three years prior to the anticipated school opening for a new elementary school, and four years for a new secondary school. One of our most recent partnerships includes the Town of East Gwillimbury Parks and Recreation programming space at Phoebe Gilman PS, which opened in September 2013.

Existing Schools

As part of the capital planning process, staff will review student enrolment projections and school capacities at existing schools over the next five years. This will include a review of underutilized schools from the perspective of how these spaces may be required to meet the Board’s existing educational program needs and initiatives. Consistent with past practice, Board staff will continue to pursue appropriate partnerships at existing schools to meet the needs of students.

Note: Projections for 2019-20 are as of the 2014-15 school year. They reflect assumptions for new development, program locations and student movement as of the 2014-15 school year, and are subject to change.

Appendix 4 - Boundary Process

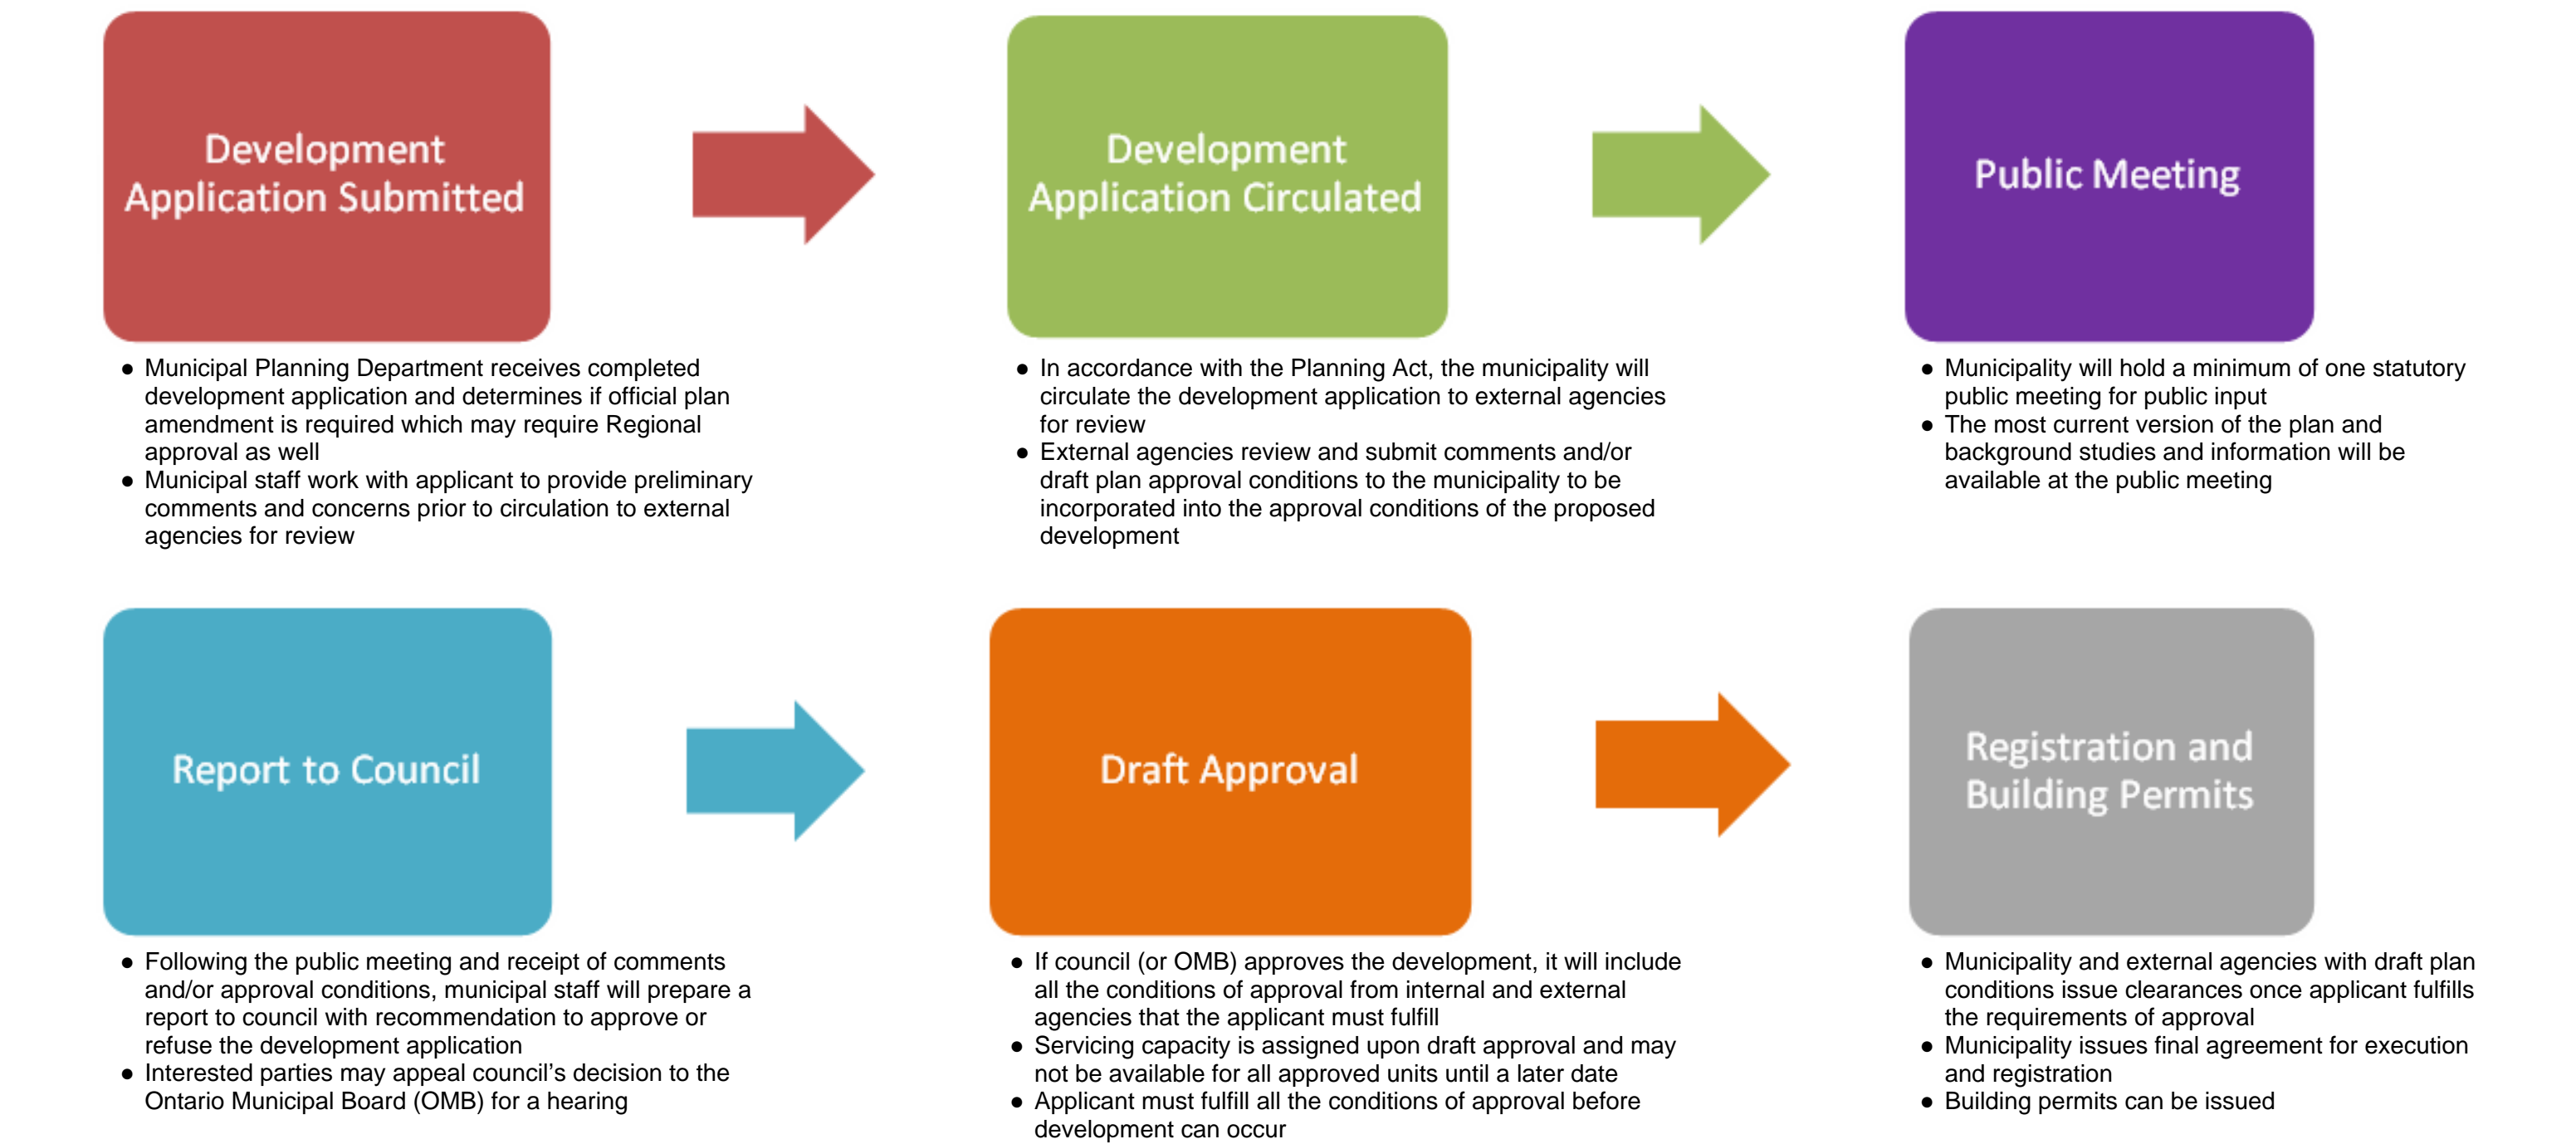

The purpose of the boundary review process is to create effective long-term boundaries for elementary and secondary schools whilst obtaining school community input on the proposed changes. Current attendance boundaries are amended due to many factors; including the construction of new schools, program changes, and to align elementary and secondary boundaries. Staff is required to bring any boundary changes to the Board for review and approval, in accordance with [Policy #108.0, Student Accommodation – Attendance Areas and Student Transfers](#).

For school boundary information, the planning department is the point of contact for school staff, superintendents and the public. When boundary changes are proposed, planning staff and the Superintendent of Schools bring forth reports for consideration by the Board through the process outlined below.

Appendix 5 - Development Process

Residential development applications are submitted to the municipal planning departments who coordinate and circulate complete applications to other relevant municipal staff and external agencies, such as, but not limited to, school boards, upper tier municipal government (York Region), conservation authorities, utilities, and provincial agencies for their comments and/or conditions of draft approval. The municipality works with the applicant to ensure the proposed development is suitable for the location, and consistent with the policies and intent of the Official Plan/Secondary Plan policies, zoning by-laws, design guidelines and any other relevant development standards. This application process may take several years from application submission to registration, and even longer if there are other considerations such as infrastructure, additional studies and draft approval conditions from external agencies to fulfill.
